

# Contents

Preface	10
Check-list of mathematical terms	11
<b>Introduction to the activities</b>	13
1 Geometry and the early school years	13
Children and the language of mathematics	13
On looking at shape	16
Children and their world	19
The task of the primary school	20
At home and at school	21
2 The use of this book	24
The plan of the material	24
Strategy for the teacher	26
A note for headteachers	29
<b>Geometrical activities and investigations</b>	31
1 The language of shape	31
2 Size and shape	34
3 The use of language	35
4 Looking at cubes	37

5	Ordering by size	38
6	Evaluation (i)	41
7	Looking and seeing	42
8	Shape and space	43
9	Exploring the cube	46
10	Looking at other shapes	49
11	Soup tins and tennis balls	50
12	Hills and valleys	52
13	Names and things	53
14	Drawing around shapes	55
15	The circle board	58
16	Outlines in motion	59
17	Looking at shadows	61
18	Introduction to nets	62
19	Looking at lines	64
20	Paths and points	66
21	Closed and open curves	67
22	Lines as paths	69
23	Looking at straight lines	70
24	This way, please	71
25	Sharp points and blunt points	73
26	Steep slopes and gentle slopes	74
27	The triangle as a shape	75
28	Putting a straight line to use	77
29	The direction board	79
30	Putting two straight lines to use	81

31	Looking at geoboards	82
32	Another look at cubes	83
33	Angles	85
34	A look at surfaces	87
35	Evaluation (ii)	89
36	Putting three straight lines to use	90
37	The four-line configuration	92
38	Beyond the quadrilateral	94
39	Straight lines in three dimensions	95
40	Patterns with plane shapes	96
41	Looking at cuboids	97
42	Symmetry patterns	99
43	The two-part tangram	101
44	Three-part tangrams	103
45	Five- and seven-part tangrams	105
46	Boxing the compass	107
47	Beginning tessellations	109
48	Knots	111
49	An activity with polygons	113
50	Evaluation (iii)	115
	<i>Appendix I</i> Apparatus and materials	118
	<i>Appendix II</i> The way ahead	120
	Bibliography	124
	Index	125
