

Brief table of contents

Preface	ix
Guided tour	xii
Acknowledgements	xviii
PART 1	
Essentials of Research	1
1 The nature of business and management research	3
2 The research process and proposal	55
3 Literature review	106
4 Ethics in business research	153
PART 2	
Research Approaches	189
5 Quantitative and qualitative research	191
6 Sampling strategies: from one case to the whole population	223
7 Survey research	276
8 Secondary data and archival sources	315
9 Observations, content analysis, action and ethnographic research	343
10 Case studies and qualitative interviews	374
11 Experimentation	395
PART 3	
Research Instruments	435
12 Measurements and scales	437
13 Field work: questionnaire and responses	502
14 Writing up and presenting research outcomes	554
Cases	597
Appendices	633
Index	
PART 4	
Statistical Background (on CD-ROM only)*	687
15 Data preparation and description	689
16 Exploring, displaying and examining data	718
17 Hypothesis testing	741
18 Measures of association	789
19 Multivariate analysis: an overview	828

Detailed table of contents

Preface	<i>ix</i>	Research Methods in Practice 2: Boiling the problem down?	96
Guided tour	<i>xii</i>	Summary	100
Technology to enhance learning and teaching	<i>xiv</i>	Discussion questions	101
Acknowledgements	<i>xviii</i>	Recommended further reading	105
PART 1 Essentials of Research	1	3 Literature review	106
1 The nature of business and management research	3	3.1 Aims and objectives of a review	106
1.1 Why study research?	4	3.2 Assessment of a 'good' literature review	109
1.2 What is research?	7	3.3 Process and organization	114
1.3 Is research always problem-solving based?	13	3.4 Meta analysis	135
1.4 What makes good research?	15	Research Methods in Practice 3: How do you write a literature review about a topic that has hardly been researched?	138
1.5 Research philosophies	19	Summary	145
1.6 Understanding theory: components and connections	30	Discussion questions	146
1.7 Propositions and hypotheses	39	Recommended further reading	148
1.8 Theory	44	Spotlight on research 1: Advanced searching	149
Research Methods in Practice 1: Why should we cooperate?	47	4 Ethics in business research	153
Summary	48	4.1 What are research ethics?	154
Discussion questions	49	4.2 Ethical treatment of participants	156
Recommended further reading	54	4.3 Data collection in cyberspace	161
2 The research process and proposal	55	4.4 Ethics and the sponsor	164
2.1 The research process	56	4.5 Researchers and team members	166
2.2 The management question	60	4.6 Ethical obligations to the research community	167
2.3 From research to measurement question	63	4.7 Professional standards	170
2.4 Research process problems	67	Research Methods in Practice 4: What to reveal?	176
2.5 Designing the study	69	Summary	179
2.6 Resource allocation and budgets	70	Discussion questions	180
2.7 Valuing research information	70	Recommended further reading	184
2.8 The research proposal	72	Spotlight on research 2: Do data warehouses challenge fair play?	185
2.9 Pilot testing	74	PART 2 Research Approaches	189
2.10 Data collection	74	5 Quantitative and qualitative research	191
2.11 Analysis and interpretation	75	5.1 Qualitative and quantitative studies	191
2.12 Reporting the results	76	5.2 What is research design?	195
2.13 The research proposal in detail	76	Research Methods in Practice 5: Social embeddedness as a new concept	216
2.14 Types of research proposal	79	Summary	218
2.15 Structuring the research proposal	82	Discussion questions	219
2.16 Bibliography	89	Recommended further reading	222
2.17 Appendix	89		
2.18 Evaluating the research proposal	95		

6 Sampling strategies: from one case to the whole population	223	9.2 Evaluation of the observational method	349
6.1 Unit of analysis	224	9.3 The observer-participant relationship	350
6.2 The nature of sampling	226	9.4 Conducting an observational study	352
6.3 Sample versus census	232	9.5 Designing an observational study	358
6.4 Types of sample design	233	9.6 Content analysis	361
6.5 Steps in sampling design	236	9.7 Narrative analysis	364
6.6 Complex probability sampling	242	9.8 Action research	365
6.7 Non-probability sampling	250	9.9 Ethnographic studies	366
6.8 Sampling on the Internet	255	Research Methods in Practice 9:	
Research Methods in Practice 6:		Observing cooperative behaviour	367
Purposive sampling	257	Summary	369
Summary	259	Discussion questions	370
Discussion questions	261	Recommended further reading	373
Recommended further reading	264	10 Case studies and qualitative interviews	374
Spotlight on research 3: Applying concepts	266	10.1 Case studies	374
7 Survey research	276	10.2 Qualitative interviews	385
7.1 Characteristics of the communication approach	276	Research Methods in Practice 10:	
7.2 Choosing a communication method	281	Could we have done a case study?	391
7.3 Personal interviewing	281	Summary	393
7.4 Telephone interviewing	294	Discussion questions	393
7.5 Self-administered surveys	297	Recommended further reading	394
7.6 Web-based surveys	303	11 Experimentation	395
7.7 Selecting an optimal method	306	11.1 What is experimentation?	395
7.8 Outsourcing survey services	306	11.2 An evaluation of experiments	397
Research Methods in Practice 7:		11.3 Conducting an experiment	398
Combining written surveys and interviews	307	11.4 Validity in experimentation	403
Summary	309	11.5 Experimental research designs	407
Discussion questions	310	Research Methods in Practice 11:	
Recommended further reading	314	Trust games	425
8 Secondary data and archival sources	315	Summary	427
8.1 Secondary data	315	Discussion questions	428
8.2 Sources of secondary data	321	Recommended further reading	431
8.3 How to use secondary data efficiently	325	Spotlight on research 4: a job-enrichment quasi-experiment	432
8.4 Secondary data in qualitative research	328	PART 3 Research Instruments	435
8.5 Data-mining	329	12 Measurement and scales	437
Research Methods in Practice 8:		12.1 The nature of measurement	438
Digging contract and other archives	337	12.2 Data types	439
Summary	339	12.3 Sources of measurement differences	445
Discussion questions	339	12.4 Characteristics of sound measurement	447
Recommended further reading	342	12.5 The nature of measurement scales	460
9 Observations, content analysis, action and ethnographic research	343	12.6 Response methods	463
9.1 The uses of observation	344	12.7 Measurement scale construction	473

Research Methods in Practice 12:		B Decision theory problem	648
Measuring contracts and uncertainty	485	C Sample student term project	656
Summary	488	D Non-parametric significance tests	665
Discussion questions	490	E Selected statistical tables	674
Recommended further reading	496		
Spotlight on research 5: Measuring job satisfaction	497	Index	
13 Fieldwork: questionnaires and responses	502	PART 4 Statistical Background (on CD-Rom only)	687
13.1 Developing the instrument design strategy	503	15 Data preparation and description	689
13.2 The management research question hierarchy revisited: phase 1	503	15.1 Introduction	690
13.3 Constructing and refining the measurement questions: phase 2	507	15.2 Editing	690
13.4 Question content	510	15.3 Useful rules for editing	692
13.5 Response strategy	520	15.4 Data entry	703
13.6 Sources of existing questions	529	15.5 Descriptive statistical summaries	707
13.7 Drafting and refining the instrument: phase 3	530	Summary	714
Research Methods in Practice 13	541	Discussion questions	715
Summary	547	Recommended further reading	717
Discussion questions	548	16 Exploring, displaying and examining data	718
Recommended further reading	552	16.1 Introduction	718
14 Writing up and presenting research outcomes	554	16.2 Exploratory data analysis	719
14.1 The written research report	555	Summary	735
14.2 Research report components	558	Discussion questions	736
14.3 Writing the report	568	Recommended further reading	740
14.4 Presentation considerations	575	17 Hypothesis testing	741
14.5 Oral presentations	584	17.1 Introduction	742
Research Methods in Practice 14	591	17.2 Hypothesis testing	742
Summary	593	17.3 Statistical testing procedures	751
Discussion questions	594	17.4 Tests of significance	753
Recommended further reading	596	Summary	782
Cases	597	Discussion questions	783
1 A GEM of a study	599	Recommended further reading	788
2 Can this study be saved?	603	18 Measures of association	789
3 Inquiring minds want to know – NOW!	605	18.1 Introduction	790
4 Highland Bank: teeing-up a new strategic direction	612	18.2 Bivariate correlation analysis	791
5 Ramada demonstrates its personal best	627	18.3 Non-parametric measures of association	812
6 Women getting Equal in public services	630	Summary	821
Appendices	633	Discussion questions	822
A Core business reference sources, printed and electronic	635	Recommended further reading	827
		19 Multivariate analysis: an overview	828
		19.1 Introduction	828
		19.2 Selecting a multivariate technique	829
		19.3 Dependency techniques	832
		19.4 Interdependency techniques	854
		Summary	867
		Discussion questions	868
		Recommended further reading	871
