

# CONTENTS

Foreword	<i>page</i> vii
Preface	ix
Introduction	xi
I BASIC GEOMETRY	
1 First ideas	1
2 Parallel lines	18
3 The measurement of distance and angle; area	34
II TRANSFORMATIONS AND THEIR ALGEBRA	
4 Reflections	47
5 Rotations	63
6 Translations	82
7 Glide reflections	91
6 The analysis of isometries; groups	102
9 Circles	119
10 Ratio properties; enlargements	140
11 Similarity transformations; spiral similarities and sketch reflections	161
III THE USE OF MATRICES	
12 Matrices for geometry	181
13 Matrices: isometry and other transformations	214
14 Eigenvalues	226
15 The non-homogeneous similarities	240
Miscellaneous Exercise	250
Two Problems	262
Appendix	268
Answers	269
Index	275
