<b>List of Examples</b>	<b>xi</b>
<b>Special Symbols</b>	<b>xiii</b>
<b>Preface</b>	<b>xv</b>
<b>1. Introduction</b>	<b>1</b>
1.1. Methods of Proof, 1	
1.2. Some Greek Geometers, 2	
1.3. Cartesian Geometry, 6	
1.4. Hilbert's Axioms, 11	
1.5. Finite Coordinate Planes, 12	
1.6. The Theorems of Pappus and Desargues, 14	
Suggested Reading, 17	
<b>2. Affine Planes</b>	<b>18</b>
2.1. Definitions and Examples, 18	
2.2. Some Combinatorial Results, 23	
2.3. Finite Planes, 28	
2.4. Orthogonal Latin Squares, 33	
2.5. Affine Planes and Latin Squares, 36	
2.6. Projective Planes, 41	
Suggested Reading, 46	
<b>3. Desarguesian Affine Planes</b>	<b>47</b>
3.1. The Fundamental Theorem, 47	
3.2. Addition on Lines, 48	
3.3. Desargues' Theorem, 50	
3.4. Properties of Addition in Affine Planes, 55	
3.5. The Converse of Desargues' Theorem, 58	

- 3.6. Multiplication on Lines of an Affine Plane, 62  
 3.7. Pappus' Theorem and Further Properties, 66  
 Suggested Reading, 70

## 4. Introducing Coordinates 71

- 4.1. Division Rings, 71  
 4.2. Isomorphism, 74  
 4.3. Coordinate Affine Planes, 76  
 4.4. Coordinatizing Points, 82  
 4.5. Linear Equations, 86  
 4.6. The Theorem of Pappus, 90  
 Suggested Reading, 92

## 5. Coordinate Projective Planes 93

- 5.1. Projective Points and Homogeneous Equations in  $\mathbb{D}^3$ , 93  
 5.2. Coordinate Projective Planes, 96  
 5.3. Coordinatization of Desarguesian Projective Planes, 99  
 5.4. Projective Conics, 102  
 5.5. Pascal's Theorem, 106  
 5.6. Non-Desarguesian Coordinate Planes, 110  
 5.7. Some Examples of Veblen-Wedderburn Systems, 114  
 5.8. A Projective Plane of Order 9, 117  
 Suggested Reading, 122

## 6. Affine Space 123

- 6.1. Synthetic Affine Space, 123  
 6.2. Flats in Affine Space, 128  
 6.3. Desargues' Theorem, 131  
 6.4. Coordinatization of Affine Space, 134  
 Suggested Reading, 143

## 7. Projective Space 144

- 7.1. Synthetic Projective Space, 144  
 7.2. Planes in Projective Space, 147  
 7.3. Dimension, 150  
 7.4. Consequences of Desargues' Theorem, 154  
 7.5. Coordinates in Projective Space, 159  
 Suggested Reading, 164

## 8. Lattices of Flats 165

- 8.1. Closure Spaces, 165  
 8.2. Some Properties of Closure Spaces, 167

- 8.3. Projective Closure Spaces, 170
- 8.4. Introduction to Lattices, 171
- 8.5. Bounded Lattices; Duality, 174
- 8.6. Distributive, Modular, and Atomic Lattices, 177
- 8.7. Complete Lattices and Closure Spaces, 181
- Suggested Reading, 185

## **9. Collineations** **186**

- 9.1. General Collineations, 186
- 9.2. Automorphisms of Planes, 190
- 9.3. Perspectivities of Projective Spaces, 195
- 9.4. The Fundamental Theorem of Projective Geometry, 199
- 9.5. Projectivities and Linear Transformations, 205
- 9.6. Collineations and Commutativity, 209
- Suggested Reading, 211

## **Appendix A. Algebraic Background** **212**

- A.1. Fields, 212
- A.2. The Integers Mod  $n$ , 214
- A.3. Finite Fields, 217
- Suggested Reading, 220

## **Appendix B. Hilbert's Example of a Noncommutative Division Ring** **221**

- Suggested Reading, 223

## **Index** **225**
