Translator's Preface	viii
From the Author's Preface	1
Introduction. What is Geometry? (Final Essay)	2
Chapter I. Affine and Projective Transformations (Affinities and Projectivities)	10
1. Parallel projection of a plane onto a plane. Affine transformations of the plane	10
2. Central projection of a plane onto a plane. Projective transformations of a plane	21
3. Central projections which carry a circle into a circle. Stereographic projections	54
4. Reciprocation (polarity) of the plane. Principle of duality	66
5. Projective transformation of a line and a circle. Straightedge construction	87
Supplement	Non-Euclidean Geometry of Lobachevsky-Bolyai (Hyperbolic Geometry) 103
Solutions.	Chapter One. Affine and projective transformations 136
	Supplement. Hyperbolic geometry 219
