

# CONTENTS

## CHAPTER 1 MODERN ELEMENTARY GEOMETRY

1	<i>The Beginnings of Geometry</i>	1
2	Directed segments and angles	4
3	Ideal points and ratios	9
4	The theorem of Menelaus	12
5	Ceva's theorem	19
6	Some geometry of the triangle	25
7	More geometry of the triangle	33
8	Geometric constructions	40

## CHAPTER 2 ISOMETRIES IN THE PLANE

9	<i>The Amazing Greeks</i>	48
10	Introduction to translations, rotations, and reflections	50
11	Introduction to isometries	55
12	Transformation theory	59
13	Isometries as products of reflections	63
14	Translations and rotations	68
15	Halfturns	72
16	Products of reflections	74
17	Properties of isometries; a summary	77
18	Applications of isometries to elementary geometry	79
19	Further elementary applications	83
20	Advanced applications	87
21	Analytic representations of direct isometries	93
22	Analytic representations of opposite isometries	97

## CHAPTER 3 SIMILARITIES IN THE PLANE

23	<i>The rebirth of mathematical thinking</i>	101
24	Introduction to similarities	104
25	Homothety	106
26	Similarity	110
27	Applications of similarities to elementary geometry	114
28	Further elementary applications	119
29	Advanced applications	124
30	Analytic representations of similarities	128

## CHAPTER 4 VECTORS AND COMPLEX NUMBERS IN GEOMETRY

31	<i>The search for the meaning of complex numbers</i>	131
32	Introduction to complex numbers	134
33	Vectors	138
34	Vector multiplication	143
35	Vectors and complex numbers	150
36	Triangles in the Gauss plane	155
37	Lines in the Gauss plane	161
38	The circle	165
39	Isometries and similarities in the Gauss plane	168

## CHAPTER 5 INVERSION

40	<i>Matchless modern mathematics</i>	171
41	Inversion	175
42	Progressions, ratios, and Peaucellier's cell	180
43	Inversion and complex geometry	185
44	Applications of inversion	189

## CHAPTER 6 ISOMETRIES IN SPACE

45	<i>What next?</i>	196
46	Introduction to three dimensions	201
47	Reflection in a plane	204
48	Basic space isometries	208
49	More space isometries	211
50	Some applications	218
51	Analytic representations	222

## Appendixes

A.	A Summary of Book I of Euclid's <i>Elements</i>	226
B.	Basic Ruler and Compass Constructions	228

<b>Bibliography</b>	232
---------------------	-----

<b>Hints for Selected Exercises</b>	235
-------------------------------------	-----

<b>Answers</b>	248
----------------	-----

<b>Index</b>	288
--------------	-----
