1

Egyptian Geometry **1**

1.1	Introduction	1
1.2	Units of Length	2
	<i>Exercises</i>	<i>4</i>
1.3	Right Angles	5
1.4	Angles and Their Measurement	6
	<i>Exercises</i>	<i>8</i>
1.5	Areas of Rectangular Fields	9
	<i>Exercises</i>	<i>10</i>
1.6	Circles	12
	<i>Exercises</i>	<i>15</i>
1.7	Another Approach to the Area Enclosed by a Circle	16
	<i>Exercises</i>	<i>17</i>
1.8	Congruence	18
	<i>Exercises</i>	<i>20</i>
1.9	Similarity	21
	<i>Exercises</i>	<i>25</i>
1.10	Three-Dimensional Figures	26
	<i>Exercises</i>	<i>28</i>
1.11	Volume	30
	<i>Exercises</i>	<i>31</i>

2

Geometric Figures **33**

2.1	The Problem of Definitions	33
	<i>Exercises</i>	<i>36</i>
2.2	Points, Lines, and Planes	37
	<i>Exercises</i>	<i>41</i>

2.3	Some Subsets of the Plane	41
	<i>Exercises</i> 44	
2.4	Angles	45
	<i>Exercises</i> 47	
3		
Transformations	49	
3.1	An Example	49
	<i>Exercises</i> 52	
3.2	Interpretation of the Example	53
	<i>Exercises</i> 54	
3.3	Definition of a Transformation	55
	<i>Exercises</i> 58	
3.4	Affine Transformations	59
	<i>Exercises</i> 61	
3.5	Affine Transformations and the Drawing of Maps	61
	<i>Exercises</i> 62	
3.6	Further Applications of Affine Transformations	65
4		
Congruences	67	
4.1	Congruence and Transformations	67
	<i>Exercises</i> 69	
4.2	Congruence of Geometric Figures	70
	<i>Exercises</i> 74	
viii	<i>Contents</i>	

4.3	The SAS Condition	75
	<i>Exercises</i>	76
4.4	Further Conditions for Congruence	78
	<i>Exercises</i>	79
4.5	Translations, Rotations, and Reflections	80
	<i>Exercises</i>	83
4.6	Products of Transformations	85
	<i>Exercises</i>	87
4.7	Corresponding Parts of Congruent Figures	88
	<i>Exercises</i>	90
4.8	Inverse and Identity Transformations	91
	<i>Exercises</i>	93
4.9	The General Form of a Congruence	94
	<i>Exercises</i>	95
4.10	Congruence as an Equivalence Relation	96
	<i>Exercises</i>	99

5

Symmetry 101

5.1	Introduction	101
5.2	Congruences of a Rectangle with Itself	102
	<i>Exercises</i>	103
5.3	Reflectional Symmetry	103
	<i>Exercises</i>	104
5.4	Rotational Symmetry	105
	<i>Exercises</i>	107
5.5	Translational Symmetry	107
	<i>Exercises</i>	108
5.6	Symmetries of Three-Dimensional Figures	110
	<i>Exercises</i>	112

6

The Greek Approach to Geometry 113

6.1	Historical Introduction	113
6.2	Isosceles Triangles	115
	<i>Exercises 116</i>	
6.3	The Angle Sum of a Triangle: Intuitive Approach	116
	<i>Exercises 119</i>	
6.4	The Angle Sum of a Triangle: A More Formal Approach	121
	<i>Exercises 123</i>	
6.5	The Pythagorean Theorem	125
	<i>Exercises 128</i>	
6.6	Some Applications of the Pythagorean Theorem	129
	<i>Exercises 131</i>	

7

Similarity 135

7.1	Construction of a Scale Model	135
	<i>Exercises 137</i>	
7.2	Similitudes	137
	<i>Exercises 139</i>	
7.3	An Observation on Similar Triangles	140
	<i>Exercises 141</i>	
7.4	An Experiment of Thales	142
	<i>Exercises 143</i>	
7.5	Summary and Examples	144
	<i>Exercises 147</i>	
7.6	An Application to Carpentry	149

8

Area and Volume 151

8.1	Basic Properties of Area	151
	<i>Exercises</i> 152	
8.2	Area Enclosed by a Parallelogram	153
	<i>Exercises</i> 154	
8.3	Area of a Triangular Region	155
	<i>Exercises</i> 157	
8.4	Area of a Polygonal Region	158
	<i>Exercises</i> 159	
8.5	Circles	160
	<i>Exercises</i> 161	
8.6	The Circumference of a Circle	162
	<i>Exercises</i> 166	
8.7	The Circumference of the Earth	167
	<i>Exercises</i> 169	
8.8	The Area Enclosed by a Circle	170
	<i>Exercises</i> 173	
8.9	Approximate Measurement and Area	173
	<i>Exercises</i> 174	
8.10	Some Three-Dimensional Figures	175
	<i>Exercises</i> 178	
8.11	Volumes of Some Three-Dimensional Regions	179
	<i>Exercises</i> 181	
8.12	Surface Areas of Some Geometric Figures	182
	<i>Exercises</i> 182	

9

Spherical Geometry 185

9.1	Historical Introduction	185
-----	-------------------------	-----

9.2	Great Circles and Small Circles	186
9.3	Applications to Geography	187
	<i>Exercises 190</i>	
9.4	The Shortest Path Between Two Points	191
	<i>Exercises 193</i>	
9.5	Triangles on a Sphere	194
	<i>Exercises 195</i>	
9.6	Comparison of Spherical and Plane Triangles	197
9.7	Map Making	200
	<i>Exercises 204</i>	

10

Coordinate Geometry 207

10.1	Coordinates	207
	<i>Exercises 211</i>	
10.2	The Equation of a Line	212
	<i>Exercises 214</i>	
10.3	Transformations and Coordinates	215
	<i>Exercises 216</i>	
10.4	Congruences and Similitudes	217
	<i>Exercises 218</i>	
10.5	The Equations of a Translation	219
	<i>Exercises 220</i>	
10.6	The Equations of a Reflection	221
	<i>Exercises 223</i>	
10.7	The Equations of a Rotation	224
	<i>Exercises 224</i>	
10.8	Equations for the Product of Transformations	225
	<i>Exercises 228</i>	

10.9 The Equations of an Affine Transformation

229

Exercises 231

Answers to Selected Exercises 233
