
CONTENTS

PREFACE v

1 NUMBERS, SETS, AND FUNCTIONS 1

- 1.1 Number Systems 1
- 1.2 The Set Concept 3
- 1.3 Subsets 5
- 1.4 The Algebra of Sets 7
- 1.5 Variables 12
- 1.6 The Function Concept 13
- 1.7 Graph of a Function 17
- 1.8 Combinations of Functions 23

2 THE REAL NUMBER SYSTEM 28

- 2.1 Axioms for the Real Number System 28
- 2.2 Some Further Properties of Real Numbers 32
- 2.3 Subtraction and Division 36

3 EQUATIONS 39

- 3.1 Introduction 39
- 3.2 Solving an Equation 40

3.3	Variation	44
3.4	Quadratic Equations	47
3.5	Equations Containing Radicals	51

4 INEQUALITIES 54

4.1	Order Properties of the Real Numbers	54
4.2	Inequalities	59
4.3	Absolute Values	64
4.4	The Completeness Property	68

5 SYSTEMS OF LINEAR RELATIONS 71

5.1	Solution Sets	71
5.2	Solution by Graphs	72
5.3	Solution by Elimination	74
5.4	Systems of Equations in More than Two Variables	77
5.5	Inequalities in Two Variables	81

6 MATRICES AND DETERMINANTS 86

6.1	Matrix of a System of Equations	86
6.2	Addition and Multiplication of Matrices	89
6.3	Matrix Equations and Inverses of Matrices	92
6.4	Determinants of Second-order Matrices	97
6.5	Determinants of Third-order Matrices	100
6.6	Minors and Cofactors	100
6.7	Some Properties of Third-order Matrices	102
6.8	Applications to Systems of Linear Equations	106
6.9	Cramer's Rule	108
6.10	Other Properties of Determinants of Matrices	112
6.11	Matrices of Higher Order	117

7 MATHEMATICAL INDUCTION, THE BINOMIAL THEOREM, AND SEQUENCES 120

7.1	Mathematical Induction	120
7.2	The Binomial Theorem	125

7.3	The General Term in the Binomial Expansion	128
7.4	The Binomial Theorem for Exponents Other than Positive Integers	130
7.5	Proof of the Binomial Theorem for Positive Integral Exponents	131
7.6	Sequences and Progressions	133
7.7	Infinite Series and Repeating Decimals	138

8 EXPONENTIAL AND LOGARITHMIC FUNCTIONS 142

8.1	Introduction	142
8.2	Definition and Laws of Exponents	143
8.3	Zero and Negative Exponents	144
8.4	Scientific Notation	146
8.5	The Principal Roots of a Number	150
8.6	Fractional Exponents	151
8.7	Irrational Exponents	155
8.8	Exponential Functions	155
8.9	The Concept of a Logarithm	159
8.10	Laws of Logarithms	161
8.11	Finding the Characteristics of Common Logarithms	162
8.12	Finding the Mantissa	165
8.13	Finding a Number Whose Logarithm Is Known	166
8.14	Computation by Means of Logarithms	167
8.15	Interpolation	170
8.16	Further Practice in Logarithmic Computation	174
8.17	Other Bases for Systems of Logarithms	176
8.18	Inverse Functions	179
8.19	Logarithmic Functions	185
8.20	Exponential and Logarithmic Equations	187

9 CIRCULAR AND TRIGONOMETRIC FUNCTIONS 190

9.1	Definitions of the Circular Functions	190
9.2	Periodicity and Graphs of the Sine and Cosine Functions	197
9.3	Angles	202
9.4	Trigonometric Functions of Angles	207

9.5	Applications of Circular Functions	214
9.6	Values of the Trigonometric (Circular) Functions for Special Angles (Numbers)	219
9.7	Functions of Acute Angles	223
9.8	Tables of Trigonometric (Circular) Functions	224
9.9	Trigonometric (Circular) Functions of Large Angles (Numbers)	227
9.10	Functions of Negative Angles (Numbers) in Terms of Functions of Positive Angles (Numbers)	232

10 NUMERICAL TRIGONOMETRY 235

10.1	Introduction	235
10.2	Relations between Functions of Complementary Angles	235
10.3	Interpolation	238
10.4	Finding the Measure of an Angle	239
10.5	Use of Tables for Circular Functions	241
10.6	Some Elementary Applications of Trigonometry	242
10.7	Solution of Further Problems by Means of Right Triangles	247
10.8	Vectors	250
10.9	Angles Corresponding to a Given Value of a Function	256
10.10	Logarithms of Trigonometric Functions	257
10.11	The Law of Sines	260
10.12	The Ambiguous Case	263
10.13	Distance Between Two Points	267
10.14	The Cosine Law	268

11 TRIGONOMETRIC ANALYSIS 273

11.1	Introduction	273
11.2	Inverses of Trigonometric and Circular Functions	274
11.3	Trigonometric Identities	280
11.4	Trigonometric Equations	286
11.5	Formula for $\cos(u - v)$	290
11.6	Functions of $\left(\frac{\pi}{2}\right) - v$	292
11.7	Functions of $-v$	293
11.8	Further Addition and Subtraction Formulas	293

11.9	Functions of $2u$	298
11.10	Functions of $\frac{1}{2}v$	299
11.11	Products of Functions in Terms of Sums	303
11.12	Sums and Differences of Functions in Terms of Products	304

12 THE COMPLEX NUMBER SYSTEM 307

12.1	Introduction	307
12.2	Definition of Complex Numbers	308
12.3	Other Notation for Complex Numbers	310
12.4	Geometric Representation of Complex Numbers and Vectors	313
12.5	Polar Coordinates and Trigonometric Form of Complex Numbers	314
12.6	Multiplication and Division of Complex Numbers in Trigonometric Form	318
12.7	De Moivre's Theorem	319
12.8	Roots of Complex Numbers	321

13 THEORY OF POLYNOMIALS 325

13.1	Introduction	325
13.2	The Remainder Theorem	326
13.3	The Factor Theorem	328
13.4	Synthetic Division	330
13.5	Graph and Roots of a Polynomial	332
13.6	Number of Roots of a Polynomial Equation	336
13.7	Imaginary Roots	338
13.8	Factorization of Polynomials	340
13.9	Rational Roots of an Equation	343
13.10	Irrational Roots by Linear Interpolation	347
13.11	Further Remarks on Equations of Higher Degree	351

14 COUNTING AND PROBABILITY 352

14.1	Permutations and Combinations	352
14.2	A Fundamental Counting Principle and Tree Diagrams	353

14.3	Number of Permutations of n Different Objects Taken r at a Time without Repetitions	356
14.4	Permutations with Repetitions	357
14.5	Permutations of a Set of Objects Not All Different	357
14.6	Number of Combinations of n Different Objects Taken r at a time	360
14.7	Combinations and the Binomial Theorem	361
14.8	Probability	363
14.9	Odds and Expected Value	368
14.10	Probability of $E \cap F$	371
14.11	Probability of $E \cup F$	372
14.12	Conditional Probability	373
14.13	Independent Events	378
14.14	Repeated Independent Trials	379
14.15	Statistical or Empirical Probability	380

15 ANALYTIC GEOMETRY 383

15.1	Introduction	383
15.2	Straight Lines	384
15.3	Some Theorems on Straight Lines	390
15.4	Circles	394
15.5	Parabolas	397
15.6	Translation of Coordinate Axes	400
15.7	Ellipses	405
15.8	Hyperbolas	411
15.9	Conic Sections	418

TABLES 419

Table I	Powers, Roots, Reciprocals	420
Table II	Values of Functions and Radians	421
Table III	Logarithms of Numbers	426
Table IV	Logarithms of Trigonometric Functions	428

ANSWERS TO ODD-NUMBERED EXERCISES 433

INDEX 457
