Chapter 1	Economics and the Environment: The Role of Coatings	1
	<i>A. Milne</i>	
	1.1 Introduction	1
	1.2 Functions of Coatings	3
Chapter 2	Present and Future Coatings Legislation and the Drive to Compliance	8
	<i>J. Warnon</i>	
	2.1 Atmospheric Pollution and the Coatings Industry	8
	2.2 Legislative Reactions	12
	2.3 Paint Industry Response and Strategy	18
	2.4 The New EU Chemicals Strategy	21
	2.5 Conclusion	24
	2.6 Bibliography	24
Chapter 3	The Rheology of Coatings	26
	<i>P.A. Reynolds</i>	
	3.1 Introduction	26
	3.2 Rheology	27
	3.3 Rheological Measurements	34
	3.4 Rheological Processes Associated with Coatings	36
	3.5 Low VOC Coatings – Flow Problems and Solutions	41
	3.6 Concluding Remarks	43
	3.7 Bibliography	44

Chapter 4	Film Formation	46
	<i>A.B. Port, C. Cameron</i>	
4.1	Introduction	46
4.2	Thermoplastic Coatings	48
4.3	Solutions of Crosslinking Polymers	49
4.4	Consequences of Vitrification	59
4.5	Solventless Crosslinking Systems	60
4.6	Disperse Phase Polymer Systems	62
4.7	Bibliography	63
Chapter 5	Performance Properties of Coatings	64
	<i>A.B. Port, C. Cameron</i>	
5.1	Introduction	64
5.2	Mechanical Performance	65
5.3	Ageing Processes and the Retention of Properties	83
5.4	Chemical Exposure	91
5.5	Summary	94
5.6	Bibliography	95
Chapter 6	Binders for Conventional Coatings	96
	<i>A.R. Marrion</i>	
6.1	Binders as Polymers	96
6.2	Polymers as Binders	103
6.3	Thermoplastic Binders	105
6.4	Reactive Binders	111
6.5	Crosslinking Chemistry – Binding the Binders	116
6.6	Polymer Blends	148
6.7	Concluding Remarks	150
6.8	Bibliography	150
Chapter 7	Binders for High Solids and Solvent-free Coatings	151
	<i>A.R. Marrion, W.A.E. Dunk</i>	
7.1	Introduction	151
7.2	High-solids and Solvent-free liquids	152
7.3	Powder Coatings	185
7.4	Non-aqueous Dispersions	196
7.5	Concluding Remarks	199
7.6	Bibliography	200

Chapter 8	Binders for Waterborne Coatings	201
	<i>W.A.E. Dunk</i>	
8.1	Introduction	201
8.2	Colloidal and Non-colloidal Systems	201
8.3	Emulsion Polymerisation	203
8.4	Some Post-Harkins, Smith-Ewart Developments	211
8.5	Practical Aspects of Emulsion Polymerisation	214
8.6	Outlook for Latex-Based Coatings	217
8.7	Pseudo-latexes	219
8.8	Dispersion Polymerisation	220
8.9	Water Reducible Systems	222
8.10	Hydrosols	224
8.11	Micro-gel	225
8.12	Crosslinking of Water-borne Coatings	227
8.13	Bibliography	236
Chapter 9	Inorganic and Hybrid Coatings	237
	<i>C. Cameron</i>	
9.1	Introduction	237
9.2	Inorganic Polymers and their Use in Coatings Technology	239
9.3	Specific Examples of Inorganic Coatings by End-use	255
9.4	Summary	266
9.5	Bibliography	266
Chapter 10	Coatings Components Beyond Binders	267
	<i>A. Guy</i>	
10.1	Introduction	267
10.2	Pigments	267
10.3	Solvents	291
10.4	Additives	297
10.5	Bibliography	315
Chapter 11	The Science and Art of Paint Formulation	317
	<i>A. Guy</i>	
11.1	Introduction	317
11.2	Basic Paint Formulation	317
11.3	Formulation for Performance	324

11.4 Formulation for Application	333
11.5 Formulation for Compliance	335
11.6 Formulation for Economy	342
11.7 Conclusions	346
11.8 Bibliography	346

Chapter 12 Application and Applications **347**

A.R. Marrion

12.1 Introduction	347
12.2 Substrates and their Preparation	348
12.3 The Application of Coatings	350
12.4 Markets for Coatings	354
12.5 Conclusion	359

Glossary **360**

Subject Index **374**
