Contents

1 The Grötzsch argument 1
- 1.1 Maps on rectangles 1
- 1.2 Some definitions 2
- 1.3 Solving the Grötzsch problem 3
- 1.4 Composed mappings 5
- 1.5 Riemann surfaces 7

2 Geometric definition of quasiconformal maps 10
- 2.1 Extremal length 11
- 2.2 Curve families 13
- 2.3 Geometric definition of quasiconformal maps 14

3 Analytic properties of quasiconformal maps 19
- 3.1 Analytic definition and corollaries 19
- 3.2 Extremal ring domains 23
- 3.3 Hölder continuity 26
- 3.4 Compactness properties of quasiconformal maps 29

4 Quasi-isometries and quasisymmetric maps 31
- 4.1 Cross-ratio 31
- 4.2 Quasisymmetric maps 32
- 4.3 Quasi-isometry 36
- 4.4 The barycentric extension 41

5 The Beltrami differential equation 48
- 5.1 Integral transforms 48
- 5.2 Solution of the Beltrami equation 51
- 5.3 Dependence on Beltrami coefficients 57

6 Holomorphic motions and applications 64
- 6.1 Holomorphic motions 64
- 6.2 Equivariant extensions 68
- 6.3 Area distortion 71

7 Teichmüller spaces 76
7.1 Universal Teichmüller space 76
7.2 Teichmüller space of a Riemann surface 77
7.3 Teichmüller metric 80
7.4 The Teichmüller space of a torus 84
7.5 Schwarzian derivatives and quadratic differentials 88
7.6 The Bers embedding 92
7.7 Complex structure on Teichmüller space 97

8 Extremal quasiconformal mappings 104
8.1 Examples of extremal mappings 104
8.2 The Hamilton–Krushkal condition 109
8.3 The Main Inequality 116
8.4 Sufficiency of the Hamilton–Krushkal condition 118

9 Unique extremality 123
9.1 The frame mapping condition 123
9.2 Some necessary conditions for unique extremality 130
9.3 Delta inequalities 132
9.4 Beltrami differentials with constant modulus 135
9.5 Beltrami differentials with non-constant modulus 139
9.6 Hahn–Banach extensions 145

10 Isomorphisms of Teichmüller space 149
10.1 The Kobayashi metric 149
10.2 Equimeasurability 152
10.3 Isometries of Bergman spaces 156
10.4 Geometric isometries in the general case 159
10.5 Biholomorphic maps between Teichmüller spaces 171

11 Local rigidity of Teichmüller spaces 173
11.1 Bergman kernels 173
11.2 Operators on $A^1(M)$ 177
11.3 An isomorphism between $A^1(M)$ and l^1 180
11.4 Local bi-Lipschitz equivalence of Teichmüller spaces 182
