

CONTENTS

<i>Chapter</i>	<i>Page</i>
1. ERRORS OF OBSERVATION	9
1 Accidental and systematic errors; 2 Errors and fractional errors; 3 Estimate of error; 4 Estimate of the error in compound quantities; 5 Error in a product; 6 Error in a quotient; 7 Use of the calculus; 8 Error in a sum or difference.	
2. SOME STATISTICAL IDEAS	29
9 Frequency distributions; 10 The mean; 11 Relative frequency; 12 The median; 13 Frequency curves; 14 Measures of dispersion; 15 The range; 16 The mean deviation; 17 The standard deviation; 18 Evaluation of standard deviation, σ ; 19 Sheppard's correction; 20 Charlier's checks; 21 The mean and standard deviation of a sum; 22 Certain special frequency distributions; 23 The binomial distribution; 24 The Poisson distribution; 25 The normal distribution; 26 Relation between a normal and a binomial distribution; 27 The mean deviation of a normal distribution; 28 Area under the normal error curve; 29 Sampling, standard error of the mean; 30 Bessel's formulæ; 31 Peters' formulæ; 32 Fitting of a normal curve; 33 Other frequency distributions.	
3. THEORY OF ERRORS	72
34 The normal or Gaussian law of error; 35 Applicability of the normal law of error; 36 Normal error distributions; 37 Standard error of a sum or difference; 38 Standard error of a product; 39 Standard error of a compound quantity; 40 Method of least squares; 41 Weighted mean; 42 Standard error of weighted mean; 43 Internal and external consistency; 44 Other applications of the method of least squares, solution of linear equations; 45 Solution of linear equations involving observed quantities; 46 Curve fitting; 47 Line of regression; 48 Accuracy of coefficients; 49 Other curves.
