

Contents

PART I

I. LINEAR PROGRAMMING

INTRODUCTION TO LINEAR PROGRAMMING	
R. M. Thrall	3
NOTES ON A CONSTRUCTIVE APPROACH TO LINEAR PROGRAMMING	
M. L. Balinski	38
A CLASS OF LINEAR PROGRAMMING PROBLEMS REQUIRING A LARGE NUMBER OF ITERATIONS	
Victor Klee	65
LARGE-SCALE LINEAR PROGRAMMING	
George B. Dantzig	77

II. PIVOT THEORY AND QUADRATIC PROGRAMS

ON COMPLEMENTARY PIVOT THEORY	
C. E. Lemke	95
COMPLEMENTARY PIVOT THEORY	
Richard W. Cottle and George B. Dantzig	115
COMPLEMENTARY SLACKNESS IN DUAL LINEAR SUBSPACES	
A. W. Tucker	137
THE PRINCIPAL PIVOTING METHOD OF QUADRATIC PROGRAMMING	
Richard W. Cottle	144
A LEAST-DISTANCE APPROACH TO QUADRATIC PROGRAMMING	
A. W. Tucker	163

III. CONVEX POLYHEDRA AND INTEGER PROGRAMS

INTEGER PROGRAMMING: METHODS, USES, COMPUTATION

M. L. Balinski 179

FACETS AND VERTICES OF TRANSPORTATION POLYTOPES

Victor Klee and Christoph Witzgall 257

FACES OF AN INTEGER POLYHEDRON

R. E. Gomory 283

ON THE RELATION BETWEEN INTEGER AND NONINTEGER SOLUTIONS TO LINEAR PROGRAMS

R. E. Gomory 288

ESTIMATION OF EIGENVALUES OF A MATRIX AND THE THEORY OF LINEAR INEQUALITIES

A. J. Hoffman 295

IV. COMBINATORICS

NETWORKS, FRAMES, BLOCKING SYSTEMS

D. R. Fulkerson 303

MATROID PARTITION

Jack Edmonds 335

OPTIMUM BRANCHINGS

Jack Edmonds 346

V. NONLINEAR PROGRAMMING

AN OUTLINE OF NONLINEAR PROGRAMMING

Philip Wolfe 365

DUALITY IN NONLINEAR PROGRAMMING

R. T. Rockafellar 401

INDEX

423

PART II

VI. CONTROL THEORY

A SURVEY OF CERTAIN ASPECTS OF CONTROL THEORY Lucien W. Neustadt	3
NECESSARY CONDITIONS FOR OPTIMALITY IN CONTROL PROGRAMMING E. Polak	17
LINEAR CONTROL PROCESSES AND MATHEMATICAL PROGRAMMING George B. Dantzig	31
NUMERICAL SOLUTION OF OPTIMAL CONTROL PROBLEMS J. B. Rosen	37

VII. MATHEMATICAL ECONOMICS

MATHEMATICAL ECONOMICS Harold W. Kuhn	49
APPLICATIONS OF CONTROL THEORY TO ECONOMIC GROWTH Kenneth J. Arrow	85
ANALYSIS OF A ONE GOOD MODEL OF ECONOMIC DEVELOPMENT David Gale and W. R. Sutherland	120

VIII. DYNAMIC PROGRAMMING

MARKOVIAN DECISION PROCESSES—AVERAGE COST CRITERION Cyrus Derman	139
OPTIMAL STOCHASTIC CONTROL Herman Chernoff	149
ON THE OPTIMALITY OF (s, S) INVENTORY POLICIES: NEW CONDITIONS AND A NEW PROOF Arthur F. Veinott, Jr.	173

IX. APPLIED PROBABILITY AND STATISTICS

BRANCHING PROCESSES

Samuel Karlin	195
---------------	-----

DIFFUSION APPROXIMATIONS IN APPLIED PROBABILITY

Donald L. Iglehart	235
--------------------	-----

RELIABILITY THEORY

Richard E. Barlow	255
-------------------	-----

ITERATED LOGARITHM INEQUALITIES AND RELATED
STATISTICAL PROCEDURES

H. Robbins and D. Siegmund	267
----------------------------	-----

X. MATHEMATICAL PSYCHOLOGY AND LINGUISTICS

MATHEMATICAL LEARNING THEORY

M. Frank Norman	283
-----------------	-----

A SURVEY OF MEASUREMENT THEORY

David Krantz	314
--------------	-----

TWO DIMENSIONAL VISUAL GEOMETRY

Andrzej J. Ehrenfeucht	351
------------------------	-----

MATHEMATICAL LINGUISTICS

Stanley Peters	353
----------------	-----

XI. COMPUTER SCIENCE

COMPUTER SCIENCE

A. H. Taub	371
------------	-----

COMPUTER SCIENCE

W. F. Miller	383
--------------	-----
