

1 INTRODUCTION 1

part

MODELS

2 PSYCHOLOGICAL MEASUREMENT THEORY 7

- 2.1 Introduction 7
- 2.2 The Representation Problem 10
- 2.3 The Uniqueness Problem 14
- 2.4 The Meaningfulness Problem 17
- 2.5 Psychological Measurement Models 19
- 2.6 Concluding Comments 29

3 SCALING AND DATA THEORY 31

- 3.1 Relations to Measurement Theory 31
- 3.2 Data Theory 32
- 3.3 The Dominance Matrix 38
- 3.4 The Proximity Matrix 51

4 NONNUMERICAL MODELS 77

- 4.1 Introduction 77
- 4.2 Graph Theory 78
- 4.3 Analysis of Group Relations in Terms of Gergonne's Set Relations 94
- 4.4 Simulation 101

part

DECISION**5 INDIVIDUAL DECISION MAKING 113**

- 5.1 Introduction 113
- 5.2 Decision with Incomplete Knowledge: Theories of Risky Choice 115
- 5.3 Decisions with Unsure Preferences: Probabilistic Theories of Choice 148
- 5.4 Concluding Comments 163

6 THE THEORY OF SIGNAL DETECTABILITY 165

- 6.1 Historical Background and Origins 165
- 6.2 An Illustrative Example 166
- 6.3 Response Thresholds, β 168
- 6.4 The ROC Curve 175
- 6.5 The Ideal Receiver 180
- 6.6 Implications for Sensory Thresholds 183
- 6.7 Experimental Invariance of d' 193
- 6.8 The Human Observer 199

7 GAME THEORY 202

- 7.1 Introduction 202
- 7.2 Strictly Competitive Games 206
- 7.3 Partly Competitive Games 217
- 7.4 Concluding Comments 226

part

**LEARNING AND
INFORMATION THEORY****8 SEQUENTIAL PROCESSES 231**

- 8.1 Basic Concepts 231
- 8.2 Sequential Plays of the Prisoner's Dilemma Game 241
- 8.3 Interaction Sequences of Hyperaggressive and Normal Boys 249
- 8.4 Discussion 255

9	MATHEMATICAL LEARNING THEORY	256
9.1	Early Mathematical Learning Theory	256
9.2	Operator Models	259
9.3	State Models	279
10	INFORMATION THEORY	307
10.1	Introduction	307
10.2	The Concepts of Information and Uncertainty	308
10.3	Properties of Uncertainty	312
10.4	Transmission	319
10.5	Application to Analysis of Form	326
10.6	Application to Human Performance	331
10.7	Pure Transmission Tasks	333
10.8	Ambiguity Intolerant Tasks	344
10.9	Critique	349
	MATHEMATICAL APPENDIX	351
A.1	Introduction	351
A.2	Sets	352
A.3	Cartesian Products	361
A.4	Equivalence Relations, Order Relations, and Functions	367
A.5	Distance	371
A.6	Multiplication of Vectors and Matrices	377
A.7	Permutations and Combinations	380
A.8	Probability of Events in Discrete Sample Spaces	381
A.9	The General Concept of Probability	386
