

## TABLE OF CONTENTS

<b>Introduction and overview</b> .....	1
Notes Introduction .....	4
<b>1 Description of the fraction problem</b> .....	5
1.1 Introduction and overview .....	5
1.2 Pointing out the problem .....	6
1.3 Description of the problem .....	7
1.3.1 Historical perspective .....	7
1.3.2 Outlining the problem .....	11
1.4 Overview and outlook .....	12
Notes chapter 1 .....	13
<b>2 Currents – standpoint– proposal</b> .....	15
2.1 Introduction and overview .....	15
2.2 Currents .....	15
2.2.1 The structuralistic approach .....	15
2.2.2 The mechanistic approach .....	16
2.2.3 Pragmatic structuralism .....	17
2.2.4 Intermezzo .....	17
2.2.5 The realistic approach .....	19
2.2.6 The empiristic approach .....	22
2.3 Standpoint .....	22
2.4 Proposal .....	24
2.5 Review and outlook .....	24
Notes chapter 2 .....	26
<b>3 The context of the research</b> .....	29
3.1 Introduction and overview .....	29
3.2 Starting from the construction principle .....	29
3.3 Development research .....	34
3.4 Design and method .....	35
3.5 The research group .....	37
3.5.1 Introduction .....	37
3.5.2 A closer description of the research group .....	38
3.6 The researcher's position .....	38
3.6.1 Roles .....	38
3.6.2 Between participation and distance .....	39
3.7 Conclusion .....	41
Notes chapter 3 .....	42

<b>4</b>	<b>The course in theory and practice .....</b>	<b>46</b>
4.1	Introduction and overview .....	46
4.2	Global outline of the fraction course .....	46
	4.2.1 Foreword .....	46
	4.2.2 Producing fractions .....	47
4.3	Producing fractions: the teaching experiment .....	62
	4.3.1 Foreword .....	62
	4.3.2 'Starting Fractions', or furnishing the concrete level .....	63
	4.3.3 'Continuing fractions', or en route to higher levels. Seating arrangements and dividing in other than distribution situations .....	94
	4.3.4 'Repeating fractions', or reviewing the rules .....	117
4.4	In view of mathematization .....	127
	4.4.1 Foreword .....	127
	4.4.2 The role of contexts .....	127
	4.4.3 Manifold use of symbols, diagrams and models .....	128
	4.4.4 Construction and production, or student contributions to education .....	129
	4.4.5 Interaction .....	129
	4.4.6 Intertwinement of the learning lines .....	129
4.5	Review and outlook .....	130
	Notes chapter 4 .....	131
<b>5</b>	<b>Individual portraits of the fraction researchers .....</b>	<b>135</b>
5.1	Introduction and overview .....	135
5.2	Indicators for the (improvement in) quality of the individual learning processes .....	135
5.3	The student portraits .....	141
5.4	Review and outlook .....	215
	Notes chapter 5 .....	217
<b>6</b>	<b>Internal evaluation of the learning process .....</b>	<b>218</b>
6.1	Introduction and overview .....	218
6.2	Yielding to and building up resistance to IN-distractors .....	219
6.3	Progression in schematizing through abbreviations .....	223
6.4	Models and diagrams .....	234
	6.4.1 Flexible use of models and application of schemes and diagrams .....	234
	6.4.2 Situation models .....	237
6.5	Acquiring representations fitting formally posed problems .....	239
6.6	Constructions and productions on a symbolic level .....	241
6.7	The framework of the level-theory and the course construction ...	246
6.8	Review and outlook .....	249
	Notes chapter 6 .....	251

<b>7</b>	<b>External or summative evaluation</b>	253
7.1	Introduction and overview	253
7.2	Weighing the groups	254
7.3	Comparing and characterizing the programs	255
7.3.1	Introduction	255
7.3.2	NCR and NZR	255
7.3.3	Programs containing realistic features	257
7.4	The tests	263
7.5	Results	265
7.5.1	Introduction	265
7.5.2	The final test, a qualitative analysis	265
7.6	Summary and conclusions	301
7.6.1	Introduction	301
7.6.2	Summary of the results of the experimental group	301
7.6.3	Conclusions	303
7.7	Realistic and mechanistic: a difference in effects?	305
7.8	A look ahead	309
	Notes chapter 7	310
<b>8</b>	<b>Theoretical review</b>	312
8.1	Introduction and overview	312
8.2	Teaching and learning fractions	314
8.2.1	Introduction	314
8.2.2	Amplify furnishing the first level	315
8.2.3	On to higher levels	318
8.2.4	General characteristics of vertical mathematization	322
8.3	Conclusion	324
	Notes chapter 8	325
	<b>Epilogue: Sketch of a new course</b>	
	- fractions, an integrated perspective -	326
	<b>Bibliography</b>	343
	<b>Index</b>	351
