CONTENTS

HISTORY AND ACKNOWLEDGMENTS iii

1 BEYOND THE WHOLE NUMBERS 1
David W. Wells and Stuart A. Choate

The Need for Numbers beyond the Whole Numbers / Physical Models for Rational Numbers / Strategies for Introducing Rational Numbers / Summary

2 FRACTIONS AND RATIONAL NUMBERS 25
Leon A. Henkin

Problems Giving Rise to Rational Numbers / Fractions as Numerals; Equivalent Numerals / Why We Use Equivalent Fractions in Computation / Computing Equivalent Fractions / Summary

3 ADDITION OF RATIONAL NUMBERS 55
Joseph Moray

Regions and Addition / Finding a Common Denominator / Finding Common Denominators to Compute Sums / Least Common Multiple / Prime Factorization / Properties of Addition of Rational Numbers / Closure Property for Addition / Addition Is Commutative / Addition Is Associative / Addition Property of 0 / Other Properties of Addition / Mixed Numerals and Sums / Summary

4 SUBTRACTION OF RATIONAL NUMBERS 86
Joseph Moray

Extension of Subtraction to Rational Numbers / Subtraction Algorithms / Equal Additions / Properties of Subtraction / The Role of 0 in Subtraction / "Shifting of Terms" in Subtraction / Summary

5 MULTIPLICATION OF RATIONAL NUMBERS 112
Harry D. Ruderman

Preparing the Student to Figure Out for Himself: Associating a Rectangular Region with an Indicated Product / Computing Products of Rational Numbers without a Traditional Algorithm / Arriving at the Traditional Algorithm for Multiplying with Fractions / An Important Consequence of the Algorithm / Properties of the Multiplication of Rational Numbers / Some Shortcuts Based on Properties of Multiplication / "Of" and "Times" / Alternate Approaches to Multiplication with Fractions Using the Number Line / Summary of Key Ideas

6 DIVISION OF RATIONAL NUMBERS 147
Harry D. Ruderman

A Strategy for Enabling a Student to Figure Out for Himself How to Compute Quotients / Interpreting a Fraction as a Quotient / Interpreting the Remainder When Dividing Whole Numbers / Properties of 0 and 1 in Division / Properties of Division of Rational Numbers / Alternate Approaches to Dividing with Fractions / Summary of Key Ideas

7 DECIMALS: ADDITION AND SUBTRACTION 179
David W. Wells and Philip L. Cox

Introducing the Extension of Decimal Numeration / Naming Rational Numbers by Decimals / Can All Rational Numbers Be Named as Decimals? / Computing Sums of Rational Numbers with Decimals / Computing Differences with Decimals / "Ragged Decimals" —Pro and Con / Summary

8 DECIMALS: MULTIPLICATION AND DIVISION 213
Donovan R. Lichtenberg

Multiplying with Decimals / Division with Decimals / Extension of the Decimal Concept—Infinite Decimals / Summary

9 MEASUREMENT 239
Lauren G. Woodby

Discrete and Continuous Quantities / The Measurement Process / Order / Arbitrary Units / Need for Rational Numbers / Area Measurement—Arbitrary Units / Weight Measurement—Arbitrary Units / Ratio / Standard Units / The Geoboard / Indirect Measurement of Length / Two Indirect-Measurement Instruments / Units of Area / Direct Measurement of Area

10 NEGATIVE RATIONALS 267
Robert B. Davis

The Game "Guess My Rule" / A First Experience with Negative Numbers / Mathematics and Legislation / A Concrete Model for Negative Integers / The Addition of Negative Rationals / Negative Rationals / The Question of "Order" / An Informal Look at the Structure of This New Number System / A Formal Development of the Negative Integers / Summary

11 OPERATIONS EXTENDED TO NEGATIVE RATIONALS 297
Abraham M. Glicksman

Subtraction Involving Negative Rational Numbers / Multiplication Involving Negative Rational Numbers / Division Involving Negative Rational Numbers / Summary

12 GRAPHING 316
Lauren G. Woodby

Scale Drawing / Graphs of Fractions on Pegboard / Graphs of Functions / Graphs of Open Sentences for Inequalities / Graphing a Special Function / Area and Perimeter / Reciprocals

ANSWERS TO EXERCISES 339

GLOSSARY 425
