1 Sequences and Limits

Introduction	1
1.1 Sequences	1
1.2 The Limit of a Sequence	4
1.3 Absolute Value	7
1.4 Other Interpretations of $\lim_{n \rightarrow \infty} x_n = X$	11
1.5 Convergent and Bounded Sequences	13
1.6 Convergence of the Geometric Sequence (Optional)	16
1.7 Least Upper Bound, Greatest Lower Bound	18
1.8 Monotonic Sequences and Convergence	21
1.9 Algebra of Sequences	25
1.10 Some Properties of Limits	29
Appendix	34

2 Functions

Introduction	35
2.1 The Function Concept	35
2.2 Some Terminology and Notation	39
2.3 Graphs of Functions	42
2.4 Monotone Functions	51
2.5 Inverse Functions	57
2.6 Constant and Linear Functions	62
2.7 Parallel and Perpendicular Lines	73
2.8 The Distance from a Point to a Line	77
2.9 The Absolute Value Function	79
2.10 Continuity	82
2.11 The Limit of a Function	87
2.12 Algebra of Functions	90
2.13 Some Properties of the Limits of Functions	92
2.14 Symmetry	95
2.15 Symmetric Functions	100
2.16 The Graph of g^{-1} Is a Reflection of the Graph of g .	105

3 Quadratic Functions

Introduction	110
3.1 The Quadratic Function $q(x) = x^2$	110

3.2	Multiplication of a Function by a Real Number	118
3.3	More about Quadratic Functions	123
3.4	Addition of a Constant to a Function	128
3.5	Composition of Functions	129
3.6	The General Quadratic Function	134
3.7	Analysis of the General Quadratic	139
3.8	The Quadratic Equation—A Graphical Interpretation	145
3.9	Tangent Lines	150
3.10	The Slope Function	154

4 Polynomial Functions

	Introduction	158
4.1	Polynomial Functions	158
4.2	Graphing Polynomial Functions	163
4.3	Continuity and the Intermediate Value Theorem	169
4.4	Slope Functions of Polynomial Functions	172
4.5	Some Properties of Slope Functions	183
4.6	Concavity	190
4.7	Basic Properties of Graphs of Polynomial Functions	196
4.8	The Remainder and Factor Theorems	202

5 Zeros of Polynomial Functions and Complex Numbers

	Introduction	207
5.1	Operations on Complex Numbers	208
5.2	Complex Conjugates and the Quotient of Complex Numbers	210
5.3	Complex Solutions of Quadratic Equations	213
5.4	The Fundamental Theorem of Algebra	215
5.5	Properties of Irreducible Quadratic Expressions	222
5.6	Zeros of Polynomials	227
5.7	Polynomials with Rational Coefficients	229
5.8	Isolating Zeros of Polynomials	234

6 Trigonometric Functions; Sine and Cosine

	Introduction	237
6.1	Measures of Angles	237
6.2	Sine and Cosine Functions Defined	246
6.3	Properties of the Sine Function	249
6.4	Properties of the Cosine Function	256
6.5	Some Identities Involving Cosine and Sine	261
6.6	The Slope Functions of the Sine and Cosine Functions	267

7 Other Trigonometric Functions

Introduction	270
7.1 The Tangent Function	270
7.2 Derivation of the Slope Function of the Tangent Function (Optional)	278
7.3 The Cotangent Function	280
7.4 The Secant and Cosecant Functions	284
7.5 More Identities	291

8 Exponential and Logarithmic Functions

Introduction	294
8.1 The Fundamental Law of Growth and Decay	294
8.2 Rational Exponents	301
8.3 More about Rational Exponents	307
8.4 The Function \exp_a Defined on \mathbb{R}	311
8.5 The Graph of \exp_a	313
8.6 The Slope Function of \exp_a (Optional)	318
8.7 Concavity of the Graph of \exp_a (Optional)	323
8.8 The Inverse of an Exponential Function	325
8.9 Logarithms to the Base a	328
8.10 Some Basic Properties of Logarithmic Functions	331
8.11 Further Properties of Logarithmic Functions	336
8.12 Computing with Common Logarithms	338
8.13 Logarithms to Different Bases	340

9 The Rational Functions

Introduction	344
9.1 The Rational Functions	344
9.2 Graphs of Rational Functions	347
9.3 Derivatives of Products, Quotients and Composites of Functions	351
9.4 More about Graphs of Rational Functions	355
9.5 Horizontal Asymptotes	359
9.6 Vertical Asymptotes	364

10 Introduction to Polar Coordinates

Introduction	374
10.1 Polar Coordinates	374
10.2 The Relationship of Polar and Rectangular Coordinates	376
10.3 Conic Sections in Polar Coordinates	379
10.4 Other Polar Curves (Optional)	382

Tables	384
