Preface	ix
Acknowledgements	xi
Chapter 1 Statistics and the education of statisticians	1
1.1 The study of statistics	1
1.2 The education of statisticians	6
1.3 The teaching of statistics	9
1.4 Feasibility and desirability	12
1.5 Other students	13
1.6 Practical statistics and the use of computers	16
1.7 Bibliographical notes	18
Chapter 2 Aims in the teaching of statistics	19
2.1 Introduction	19
2.2 Detailed breakdown of aims	20
2.2.1 General, non-technical abilities	20
2.2.2 General, partly technical, abilities	22
2.2.3 Abilities depending on technical skills	24
2.2.4 Abilities depending on technical judgement	25
2.3 Discussion	27
Chapter 3 Approaches to teaching practical statistics—a survey	29
3.1 Introduction	29
3.2 Drill exercises	30
3.3 Statistical experiments	32
3.4 Critical reading	33
3.5 Large projects	34
3.6 Applications of statistics in another subject	36
3.7 Contacts with outside statisticians	37
3.8 Consulting courses	38
3.9 External placements	39
3.10 Case histories	41
3.11 Role-playing and case studies	42
3.12 Seminar presentations	44
3.13 Discussion groups	46
3.14 Postscript	49

Chapter 4	Project-based courses	52
4.1	Introduction	52
4.2	The need for project work	53
4.3	Practical arrangements	57
4.3.1	Problems associated with large classes	62
4.4	Some particular considerations	64
4.4.1	The management of a student's time	64
4.4.2	Report writing	65
4.4.3	Oral presentation	67
4.5	Types of project	68
4.6	Particular projects discussed	69
4.6.1	Social questions	69
4.6.2	Experiment	71
4.6.3	Critical reviews	76
4.6.4	Statistical analysis	88
Chapter 5	Projects	104
5.1	Introduction	104
5.2	Sample projects	107
Project 1	Future populations	110
Project 2	Some applications of statistics in computing	111
Project 3	Anti-aircraft fire in the Second World War	112
Project 4	The plight of the whales	113
Project 5	Petrol and car mileage	114
Project 6	Astronomical statistics	116
Project 7	Social questions	117
Project 8	Delinquency and family size	123
Project 9	Olympic medals	125
Project 10	Lives of great men and women	126
Project 11	Unemployment figures	127
Project 12	The ultimate mile	128
Project 13	Catching up the men	131
Project 14	Starting a new job	132
Project 15	Short-term memory	140
Project 16	Reading habits of students	141
Project 17	Mustard and cress	142
Project 18	Reaction times	143
Project 19	Counting lampposts	144
Project 20	The local weather	145
Project 21	Wind, rain, and sun	152
Project 22	Naive forecasting	158
Project 23	Weather forecasting	159
Project 24	Eyesight of Glasgow children	160
Project 25	Maps and distances	162
Project 26	Extinction of surnames	163

Project 27	French presidential elections	165
Project 28	Digestive system of sheep	167
Project 29	Future numbers in schools and universities	169
Project 30	Prison population	170
Project 31	The demand for mathematics teachers	171
Project 32	Ball games	172
Project 33	The feeding behaviour of spiders	173
Project 34	Expedition logistics	174
Project 35	Recounts in elections	179
Project 36	Oil exploration	181
