<b>Preface</b>		
<b>1 The Straight Line</b>		1
Introduction		1
Points and Lines		1
Break-Even Analysis		5
<b>2 Linear Equations and Inequalities</b>		10
Systems of Linear Equations		10
Inequalities		12
<b>3 Linear Programming</b>		17
<b>4 Differential Calculus</b>		29
Functions		29
Differentiation		31
Economics Applications		40
Elasticity		43
Differentiation of the Exponential Function $e^x$		45
<b>5 Partial Differential Calculus</b>		50
Differentiation Revision		50
Partial Differentiation		51
Maximum and Minimum of Functions of Two Variables		61
Use of Lagrange Multiplier		66
Further Examples of Use of Lagrange Multiplier		69
<b>6 Integral Calculus</b>		75
Integration		75
Economics Applications		84
Integration of the Exponential Function $e^x$		91
Integration as the Area under a Curve and the Limit of a Sum		91
<b>7 Probability</b>		96
<b>8 Sets</b>		103
<b>9 Introduction to Statistics</b>		115
Definitions		115
The Frequency Distribution		116

Graphical Presentation of Data	page 117
Median and Mode	122
<b>10 Measures of Location and Dispersion</b>	124
Summation Notation	124
Measures of Location	125
Measures of Dispersion	130
<b>11 Index Numbers</b>	137
<b>12 Correlation and Regression</b>	148
Measuring the Degree of Association	148
Regression Lines	152
Coefficient of Determination	158
<b>13 Permutations and Combinations</b>	162
Permutations	162
Combinations	164
<b>14 The Binomial and Poisson Distributions</b>	167
The Binomial Distribution	167
The Poisson Distribution	174
<b>15 The Normal Distribution</b>	181
<b>16 The Probability Density and Cumulative Distribution Functions</b>	192
Revision: Mean and Variance	192
The Probability Density Function	194
The Cumulative Distribution Function	196
<b>17 Samples and the Standard Error</b>	203
Mean and Variance of Sample Means (Infinite Population)	203
Mean of Sample Variances (Infinite Population)	205
Variance of Sample Means and Standard Error	207
Variance of Sample Means (Finite Population)	213
<b>18 Confidence and Further Distributions</b>	217
Confidence Intervals and Levels	217
Sum and Difference Distributions	220
Proportions	224
<b>19 Hypothesis Testing</b>	229
One-Tail and Two-Tail Tests	229
Type I and Type II Errors	234
Calculation of $\beta$ (the Probability of a Type II Error) and Operating Characteristic Curves	235
Test for Difference of Means	238
Test for Difference of Proportions	240

<b>20</b>	<b>Small Samples and the <math>t</math> Distribution</b>	<i>page</i> 245
	The Student $t$ Distribution	245
	Confidence Intervals	246
	Test for Means	248
	Test for Difference of Means	250
	Paired Samples	253
<b>21</b>	<b>The <math>\chi^2</math> Distribution and Its Uses</b>	258
	The $\chi^2$ Distribution	258
	Goodness of Fit	262
	Contingency Tables	269
<b>22</b>	<b>Tests for Variance and the <math>F</math> Distribution</b>	275
	Tests for Variance	275
	The $F$ Distribution	280
<b>23</b>	<b>Analysis of Variance</b>	286
	One-Way Analysis of Variance	286
	Two-Way Analysis of Variance	296
	Design of Experiments	300
	Conversion of ANOVA Formulae	301
<b>24</b>	<b>Sampling</b>	305
	Importance and Purpose of Sampling	305
	Types of Sampling	307
	The Effect of Stratifying a Sample on Standard Error	310
	<b>Appendix: Procedure Summary Sheets (Tests and Confidence Intervals)</b>	315
	<b>Answers to Exercises</b>	320
	<b>Index</b>	326
