

CONTENTS

1 Fundamental Concepts 1

- 1.1 Introduction 1
- 1.2 Sets 1
- 1.3 The Positive Integers 5
- 1.4 The Algebra of Sets 8
- 1.5 Axioms 11
- 1.6 Integers 13
- 1.7 Addition and Subtraction in I 16
- 1.8 Multiplication and Division in I 20
- 1.9 Rational Numbers 22
- 1.10 Arithmetic of Rational Numbers 26
- 1.11 Real Numbers 30
- 1.12 The Use of Letters in Algebra 35
- 1.13 Terms, Factors, and Signs of Grouping 37

2 Polynomials 42

- 2.1 Definitions 42
- 2.2 Addition and Subtraction of Polynomials 45
- 2.3 Multiplication of Monomials 47
- 2.4 Multiplication of Polynomials 49
- 2.5 The Concept of Factorization 52
- 2.6 Factoring Out a Common Factor 53
- 2.7 The Difference of Squares and Sum or Difference of Cubes 54
- 2.8 Factoring Trinomials 57

- 2.9 Factoring by Grouping 60
- 2.10 Concluding Remarks on Factoring 61

3 Rational Algebraic Expressions 63

- 3.1 Simplification of Rational Algebraic Expressions 63
 - 3.2 Division of Polynomials 67
 - 3.3 Synthetic Division 69
 - 3.4 Multiplication and Division of Rational Algebraic Expressions 72
 - 3.5 Least Common Multiple 74
 - 3.6 Addition and Subtraction of Algebraic Fractions 77
 - 3.7 Complex Fractions 79
- Review Exercises 82

4 Word Problems 84

- 4.1 Introduction 84
- 4.2 The Basic Techniques 85
- 4.3 Further Examples 90

5 First-Degree Equations 97

- 5.1 Definitions 97
- 5.2 Equivalent Equations 100
- 5.3 Solution of a Linear Equation 103
- 5.4 The Rectangular Coordinate System 107
- 5.5 The Graph of a Linear Equation 109
- 5.6 The Slope of a Line 113
- 5.7 Graphical Solution of a Pair of Linear Equations 115
- 5.8 Algebraic Solution of a Pair of Linear Equations 117
- 5.9 Solution by Matrix Representation 125
- 5.10 Three Equations in Three Variables 128
- 5.11 The Double-Subscript Notation 134
- 5.12 Determinants of Second Order 137
- 5.13 Determinants of Higher Order 142

6 Complex Numbers 148

- 6.1 Introduction 148
- 6.2 Extension and Solvability 149
- 6.3 Definition and Properties of Complex Numbers 150
- 6.4 Square Roots 154
- 6.5 The Complex Plane 157
- 6.6 Complex Conjugates and Absolute Value 158

7 Quadratic Equations 161

- 7.1 Introduction 161
 - 7.2 Solution of Equations by Factoring 161
 - 7.3 Solution by Completing the Square 162
 - 7.4 Completing the Square in General 165
 - 7.5 The Quadratic Formula 166
 - 7.6 The Discriminant of a Quadratic Equation 171
 - 7.7 Equations Involving Radicals 173
 - 7.8 Fractional Equations 176
- Review Exercises 186

8 Functions and Graphs 189

- 8.1 Introduction 189
- 8.2 Functions 189
- 8.3 Notation 193
- 8.4 Functions and Relations 195
- 8.5 Graphs of Functions 196
- 8.6 Quadratic Equations in Two Variables 201

9 Inequalities 211

- 9.1 Definitions and Basic Principles 211
- 9.2 Conditional Inequalities 216
- 9.3 Inequalities of Higher Degree 221

- 9.4 Restrictions on the Domain of a Function 225
- 9.5 Systems of Inequalities 227
- 9.6 Linear Programming 230

10 Equations of Higher Degree 236

- 10.1 Introduction 236
 - 10.2 Equations of Quadratic Type 236
 - 10.3 Rational Roots 238
 - 10.4 Factoring Polynomials 241
 - 10.5 Approximation of Irrational Roots 244
 - 10.6 Systems of Quadratic Equations 248
- Review Exercises 256

11 Exponents and Logarithms 259

- 11.1 Positive and Negative Integral Exponents 259
- 11.2 The Principal n th Root of a Number 263
- 11.3 Fractional Exponents 270
- 11.4 Exponential Functions 274
- 11.5 The Graphing of Exponential Functions 275
- 11.6 Definition of a Logarithm 277
- 11.7 The Logarithmic Function 279
- 11.8 Properties of $\text{Log}_b x$ 280
- 11.9 Solution of Equations 282
- 11.10 Finding $\text{Log}_{10} x$ by Tables 285
- 11.11 The Antilogarithm of a Number 288
- 11.12 Computations by the Use of Logarithms 291
- 11.13 The Antilogarithm of a Negative Number 297

12 Families of Curves 298

- 12.1 Families of Curves 298
- 12.2 Determining the Constant 302
- 12.3 Variation and Proportion 304
- 12.4 Joint Variation 307

13 Sequences, Series, and the Binomial Theorem 310

- 13.1 Sequences 310
- 13.2 Series 312
- 13.3 Arithmetic Progressions 314
- 13.4 Geometric Progressions 320
- 13.5 Infinite Geometric Series 325
- 13.6 The Binomial Theorem 327

Review Exercises 332

14 More About Complex Numbers and Matrices 335

- 14.1 Square Roots of Complex Numbers 335
- 14.2 Quadratic Equations Again 337
- 14.3 Matrices 339
- 14.4 The Algebra of Matrices 342
- 14.5 Complex Numbers as Matrices 345
- 14.6 Matrix Inverses 347
