

## TABLE OF CONTENTS

<b>CHAPTER 1</b>	<b>General Introduction</b> <i>Adapted from Pflügers Arch 446:401-409, 2003 and Pflügers Arch 451:181-192, 2005</i>	<b>11</b>
<b>CHAPTER 2</b>	<b>Localization and regulation of the epithelial Ca<sup>2+</sup> channel TRPV6 in the kidney</b> <i>J Am Soc Nephrol 14:2731-2740, 2003</i>	<b>31</b>
<b>CHAPTER 3</b>	<b>Downregulation of Ca<sup>2+</sup> and Mg<sup>2+</sup> transport proteins in the kidney explains tacrolimus (FK506)-induced hypercalciuria and hypomagnesemia</b> <i>J Am Soc Nephrol 15:549-557, 2004</i>	<b>51</b>
<b>CHAPTER 4</b>	<b>Thiazide-induced hypocalciuria is accompanied by a decreased expression of Ca<sup>2+</sup> transport proteins in kidney</b> <i>Kidney Int 64:555-564, 2003</i>	<b>69</b>
<b>CHAPTER 5</b>	<b>Enhanced passive Ca<sup>2+</sup> reabsorption and reduced Mg<sup>2+</sup> channel abundance explains thiazide-induced hypocalciuria and hypomagnesemia</b> <i>J Clin Invest 115:1651-1658, 2005</i>	<b>87</b>
<b>CHAPTER 6</b>	<b>Acid-base status determines the renal expression of Ca<sup>2+</sup> and Mg<sup>2+</sup> transport proteins</b> <i>J Am Soc Nephrol 17:617-626, 2006</i>	<b>107</b>
<b>CHAPTER 7</b>	<b>Hypervitaminosis D mediates compensatory Ca<sup>2+</sup> hyperabsorption in TRPV5 knockout mice</b> <i>J Am Soc Nephrol 16:3188-3195, 2005</i>	<b>127</b>
<b>CHAPTER 8</b>	<b>The novel vitamin D analog ZK191784 as an intestine-specific vitamin D antagonist</b> <i>Submitted</i>	<b>143</b>
<b>CHAPTER 9</b>	<b>The bone resorption inhibitor alendronate normalizes the reduced bone thickness of TRPV5 knockout mice</b> <i>Manuscript in preparation</i>	<b>163</b>
<b>CHAPTER 10</b>	<b>General Discussion</b>	<b>179</b>
<b>CHAPTER 11</b>	<b>Summary</b> <b>Samenvatting (summary in Dutch)</b>	<b>203</b> <b>207</b>
<b>CHAPTER 12</b>	<b>Curriculum Vitae</b> <b>List of publications related to this thesis</b> <b>List of abbreviations</b> <b>Dankwoord</b>	<b>215</b> <b>217</b> <b>218</b> <b>220</b>
