

# Contents

Preface	7
Acknowledgments	8
<b>Part One: Introduction to the Microcomputer</b>	
1. Computer Hardware	11
2. Computer Software	31
3. Communication with the User	44
4. Computer Output	56
<b>Part Two: The Microcomputer in the Classroom</b>	
5. Introducing the Computer to the Classroom	65
6. Range of Uses of Computers	75
7. Computer Aided Instruction	85
8. The Classroom Aid (The Electronic Blackboard)	96
9. Randomness	102
10. Models and Simulations	107
11. Discovery and Investigative Learning	118
12. The Computer and Teaching Materials	124
<b>Part Three: The Microcomputer in School Administration</b>	
13. Introduction to Principles of Data Processing	131
14. Pupil Based Systems	139
15. Class Organisation	146
16. Computer Managed Learning	151
17. General Information Handling	158
<b>Appendixes</b>	
1. Choice and Assessment of Programs	165
2. Information and Program Sources	168
3. Some Computers Currently in Use	171
<b>Bibliography</b>	176
<b>Index</b>	179
