

CONTENTS

Preface

Introduction

1. The Nature of a Psychology of Mathematics 3

A Psychology of Subject-Matter Learning 4

Psychology and the Tasks of Instruction 6

PART I: MATHEMATICS AS COMPUTATION 9

2. The Psychology of Drill and Practice 11

Edward L. Thorndike and the Formation of Bonds 12

Drill Versus Meaningful Instruction 17

What Makes Arithmetic Problems Easy or Hard? 19

Optimizing the Effectiveness of Practice 24

Drill and the Development of Automaticity 30

Summary 35

3. Transfer Hierarchies and the Organization of Instruction 38

Learning Hierarchies for Mathematical Tasks 39

Introduction to Rational Task Analysis 57

Summary 64

4. Analyses of Performance on Computational Tasks 67

Simple Mathematical Tasks: The Use of Reaction-Time

Data in Studying Performance 69

Computational Strategies and Systematic Errors:

Protocol Analysis 83

Solving Context-Embedded Problems:

Computer Simulation 89

Summary 94

**PART II: MATHEMATICS AS CONCEPTUAL UNDERSTANDING
AND PROBLEM SOLVING 97**

- 5. Teaching the Structures of Mathematics 101**
 A Decade of Curriculum Reform 102
 Bruner and the Cognitive Representation of Mathematical
 Concepts 110
 Dienes' Multiple Embodiments and the Sequence of
 Instruction 116
 Questions Raised by the Structure-Oriented Approaches 123
 Summary 126
- 6. Structure and Insight in Problem Solving 128**
 Gestalt Principles and Some Mathematical Examples 129
 The Process of Productive Thinking 138
 Implications of Gestalt Thinking for Instruction 146
 Summary 152
- 7. Piaget and the Development of Cognitive Structures 155**
 Thinking as Structuring 156
 The Development of Piagetian Structures 165
 Critiques of Piaget 174
 Piaget and Instruction 186
 Summary 193
- 8. Information-Processing Analyses of Understanding 196**
 The Organization of Semantic Memory 198
 Using Knowledge and Strategy for Solving Problems 213
 Strategies for Analyzing Problems and Searching
 Knowledge Structures 220
 Summary 235

CONCLUSION

- 9. Looking Ahead 241**
 The Changing Nature of Instructional Psychology 242
 Needed: A Cognitive Learning Psychology 244
 Questions for the Psychology of Mathematics Instruction 246
 Applying Psychology To Instruction 252
