

Contents

<i>Introduction</i>	3
PART I STIMULUS-SAMPLING MODELS	
1. <i>Component and Pattern Models with Markovian Interpretations</i>	9
WILLIAM K. ESTES	
2. <i>A Model with Neutral Elements</i>	53
DAVID LABERGE	
3. <i>Applications of a Markov Model to Two-Person Noncooperative Games</i>	65
RICHARD C. ATKINSON AND PATRICK SUPPES	
4. <i>A Theory of Serial Discrimination Learning</i>	76
GORDON H. BOWER	
5. <i>Mediated Generalization</i>	94
JULIET POPPER	
6. <i>Choice-Point Behavior</i>	109
GORDON H. BOWER	
7. <i>Temporal Properties of Response Evocation</i>	125
NORMAN H. ANDERSON	
PART II ANALYSES OF LINEAR MODELS	
8. <i>Foundations of Linear Models</i>	137
WILLIAM K. ESTES AND PATRICK SUPPES	
9. <i>Applications of a Linear Model to Two-Person Interactions</i>	180
CLETUS J. BURKE	
10. <i>A Single-Operator Model</i>	204
ROBERT R. BUSH AND SAUL H. STERNBERG	
11. <i>Sequential Properties of Linear Models</i>	215
ROBERT R. BUSH	
12. <i>A Commuting-Operator Model</i>	228
MAURICE TATSUOKA AND FREDERICK MOSTELLER	

13. <i>An Analysis of Sequential Dependencies</i>	248
NORMAN H. ANDERSON	
14. <i>Some T-Maze Experiments</i>	265
EUGENE GALANTER AND ROBERT R. BUSH	
PART III	
EXTENSIONS AND COMPARISONS	
15. <i>A Comparison of Eight Models</i>	293
ROBERT R. BUSH AND FREDERICK MOSTELLER	
16. <i>A Path-Dependent Linear Model</i>	308
SAUL H. STERNBERG	
17. <i>Application of Four Models to Sequential Dependence in Human Learning</i>	340
SAUL H. STERNBERG	
18. <i>Tests of the "Beta Model"</i>	381
ROBERT R. BUSH, EUGENE GALANTER, AND R. DUNCAN LUCE	
19. <i>A Linear Model for a Continuum of Responses</i>	400
PATRICK SUPPES	
20. <i>A Survey and Classification of Learning Models</i>	415
FRANK RESTLE	
<i>Index</i>	429
