Herbert P. Ginsburg

Introduction

CHAPTER 1

Protocol Methods in Research on Mathematical Thinking

Herbert P. Ginsburg

Nancy E. Kossan

Robert Schwartz

David Swanson

Examples, Aims, Rationales	8
Comparison of Methods	16
Validity of Verbal Reports	21
Problems Related to Contingency	35
References	46

CHAPTER 2**The Acquisition of Early Number Word Meanings: A Conceptual Analysis and Review***Karen C. Fuson**James W. Hall*

Sequence Words	50
Counting Words	55
Cardinal Words	58
Measure Words	79
Measure Words and Cardinal Words	83
Ordinal Words	85
Cardinal Words and Ordinal Words	91
Nonnumerical Number Word Contexts	93
Cardinal, Sequence, and Counting Words	93
Conclusions and Comments	100
References	102

CHAPTER 3**A Developmental Theory of Number Understanding***Lauren B. Resnick*

Number Representation in the Preschooler:	
The Mental Number Line	110
Early School Arithmetic: The Part-Whole Schema	114
Development of Decimal Number Knowledge	125
Conclusion	145
References	149

CHAPTER 4**Development of Children's Problem-Solving Ability in Arithmetic***Mary S. Riley**James G. Greeno**Joan I. Heller*

Conceptual and Procedural Knowledge in Problem Solving	153
Approaches to Analyzing Knowledge in Problem Solving	155
Review of Research in Children's Word Problem Solving	156

A Theory of the Knowledge Required to Solve Word Problems	165
The Locus of Improvement in Problem-Solving Skill	170
Stages of Conceptual Knowledge	173
Related Analyses of Conceptual Understanding in Problem Solving	186
Discussion	188
References	192

CHAPTER 5

On the Representation of Procedures in Repair Theory

Kurt Van Lehn

The Repair Process	201
Constraints on Acquisition of Nonnatural Knowledge	215
The Goal Stack	225
Satisfaction Conditions, Deletion, and the Applicative Constraint	240
Varying the Representation Language Is the Key	249
References	251

CHAPTER 6

Complex Mathematical Cognition

Robert B. Davis

The Emergence of an Alternative Paradigm	254
Applications	268
Summary	288
References	288

CHAPTER 7

The Development of Numerical Cognition: Cross-Cultural Perspectives

Geoffrey B. Saxe

Jill K. Posner

Numeration Systems	292
Developmental Models	293
Cross-Cultural Research on the Development of Mathematical Concepts in Children	301
Concluding Remarks	312
References	315

CHAPTER 8

Children's Psychological Difficulties in Mathematics

Barbara S. Allardice

Herbert P. Ginsburg

The Concept of Learning Disabilities	319
Neurological and Environmental Causes	322
Cognitive Analyses	331
Cognitive Analyses: Case Studies	338
Future Directions	348
References	349

CHAPTER 9

The Many Faces of Piaget

Guy Groen

Caroline Kieran

Is Piaget Relevant to School Mathematics	352
To What Extent Is Piaget a Psychologist?	356
What Is Genetic Epistemology?	358
Is There More Than One Piaget?	361
Are Stages Necessary?	365
What Is Piagetian Mathematics?	367
References	373
<i>Author Index</i>	385
<i>Subject Index</i>	377
