Preface xi

1. Introduction

Richard Lesh and Marsha Landau

References 6

2. The Acquisition of Addition and Subtraction Concepts

Thomas P. Carpenter and James M. Moser

Introduction 7

Research on Problem Difficulty 8

Piagetian Research 11

Current Research: A Process Approach 14

Discussion 37

References 40

3. Proportional Reasoning of Early Adolescents

Robert Karplus, Steven Pulos, and Elizabeth K. Stage

Background 45

Research Questions 50

The Lemonade Puzzle Interviews 51

Cognitive and Attitudinal Correlates 62

Conclusions 72

Implications for Teaching 79

Appendix 84

References 86

4. Rational-Number Concepts

Merlyn J. Behr, Richard Lesh, Thomas R. Post, and Edward A. Silver

A Mathematical and Curricular Analysis of Rational-Number Concepts	92
The Rational-Number Project	98
Perceptual Cues and the Quality of Children's Thinking: A Project Study	108
Definitions	110
Directions for Future Research	120
Reference Note	124
References	124

5. Multiplicative Structures

Gerard Vergnaud

Preliminary Analysis	128
Experiments	140
Further Analysis and Experiments	160
Conclusion	172
References	173

6. Space and Geometry

Alan J. Bishop

Meanings and Understandings	176
Abilities and Processes	181
Spatial Understanding and Processes of Students in Papua New Guinea	186
Guidelines for Future Research	197
References	200

7. Van Hiele-Based Research

Alan Hoffer

Introduction	205
Work of the Van Hieles	206
Soviet Studies	209
Preliminary Work in the United States	210
Recent Studies in the United States	212
Other Aspects of the Van Hiele Model	219
Future Work	223
Reference Notes	226
References	226

8. Trends and Issues in Mathematical Problem-Solving Research

Frank K. Lester, Jr.

Introduction	229
The Nature of Mathematical Problem-Solving and Mathematical Problem-Solving Research	231
Overview of Mathematical Problem-Solving Research	233
Recent Studies at Indiana University	240
Issues for Future Research	249
Looking Back	255
Reference Notes	257
References	258

9. Conceptual Models and Applied Mathematical Problem-Solving Research

Richard Lesh, Marsha Landau, and Eric Hamilton

Conceptual Models	264
Background for Current Research on Applied Problem-Solving	265
Rational-Number Task Interviews	272
Rational-Number Written-Test Results	297
Concluding Remarks	306
Appendix 9.A: Reordered Versions of the CA and OA Instruments	337
Appendix 9.B: Rational-Number Characteristics on the CA and OA Instruments	337
Reference Notes	342
References	343

10. Episodes and Executive Decisions in Mathematical Problem-Solving

Alan H. Schoenfeld

Introduction	345
A Discussion of Antecedents	347
An Informal Analysis of Two Protocols	350
Framework for the Macroscopic Analysis of Problem-Solving Protocols	353
The Full Analysis of a Protocol	360
Some Empirical Results	364
Discussion	369
Appendix 10.A: Protocol 1	371
Appendix 10.B: Protocol 2	375
Appendix 10.C: Protocol 3	381
Appendix 10.D: Protocol 4	389
Appendix 10.E: Protocol 5	394

Reference Notes	394
References	395
Author Index	397
Subject Index	403
