## PART ONE PSYCHOLOGY OF MENTAL CALCULATION

Introduction	3
1 Imagining Numbers	7
2 Consciousness	22
3 Brain Hemispheres and Linearity	31
4 Age	35
5 Intelligence, Sex, and Heredity	40
6 Memory	48
7 Formal Considerations	68
8 Calculating Times and Extent	85
9 Implications	100

## PART TWO CALCULATING METHODS

10 Basic Arithmetic	109
11 Multiplication Shortcuts	117
12 Decimalization of Fractions	120
13 Roots	123
14 Powers	136
15 Factoring	140
16 Logarithms	150
17 Compound Interest	156

18	The Sum of Four Squares	158
19	Day-Date Calculations	163

PART THREE LIVES AND CALCULATING  
ACCOMPLISHMENTS

20	Jedediah Buxton	169
21	Thomas Fuller	178
22	Zerah Colburn	181
23	George Parker Bidder	211
24	Johann Martin Zacharias Dase	221
25	Henri Mondeux	227
26	Truman Henry Safford	236
27	Jacques Inaudi	242
28	Périclès Diamandi	251
29	Frank D. Mitchell	256
30	Gottfried Ruckle	261
31	Alexander Craig Aitken	266
32	Arthur Griffith	276
33	Salo Finkelstein	283
34	Wim Klein	289
35	Maurice Dagbert	299
36	Shakuntala Devi	305
37	Hans Eberstark	308
38	Shyam Marathe	313
39	Arthur Benjamin	323
40	Other Calculators Briefly Noted	331
<b>Appendix</b> George Parker Bidder on Compound Interest		349
<i>Bibliography</i>		357
<i>Index</i>		365
