

Contents

Preface	<i>ix</i>
Foreword	<i>xi</i>
1	Conceptual and Procedural Knowledge in Mathematics: An Introductory Analysis 1 <i>James Hiebert and Patricia Lefevre</i>
	Definitions of Conceptual and Procedural Knowledge 3
	Potential Relationships Between Conceptual and Procedural Knowledge 9
	Actual Relationships Between Conceptual and Procedural Knowledge 16
	The Mission of the Book 22
	References 23
2	The Notion of Principle: The Case of Counting 29 <i>Rochel Gelman and Elizabeth Meck</i>
	Initial Considerations 29
	Evidence 40
	Learning New Principles: Or Why Conceptual, Procedural, and Utilization Competence Interact 51
	Conclusion 54
	Acknowledgments 55
	References 55

- 3** Children's Mastery of Written Numerals and the Construction of Basic Number Concepts 59
Hermine Sinclair and Anne Sinclair
- The Development of Number Concepts 62
The Beginning of the Child's Construction of the Written Number System 67
Acknowledgments 73
References 73
- 4** The Relationship Between Initial Meaningful and Mechanical Knowledge of Arithmetic 75
Arthur J. Baroody and Herbert P. Ginsburg
- Informal Arithmetic 76
Basic Number Combinations 88
The Effects of Schooling 99
Conclusion 103
Acknowledgments 107
References 107
- 5** Conceptual Knowledge as a Foundation for Procedural Knowledge: Implications from Research on the Initial Learning of Arithmetic 113
Thomas P. Carpenter
- Procedural and Conceptual Knowledge in Young Children 113
Concepts, Procedures, and Instruction 124
Acknowledgments 131
References 131
- 6** Arithmetic Procedures are Induced from Examples 133
Kurt VanLehn
- Schematic versus Teleological Knowledge 138
Three Ways that Arithmetic Could be Learned 141
The Conservative Evaluation of the Induction Hypothesis 143
A Liberal Evaluation of the Induction Hypothesis 150
Learning by Analogy 152
Learning by Being Told 155
Summary 157
Concluding Remarks 159
Appendix 162
Acknowledgments 177
References 177

- 7** Using Conceptual and Procedural Knowledge:
A Focus on Relationships 181
Edward A. Silver
- Concepts, Procedures, and Problem Solving 182
Concepts versus Procedures 183
Problem Solving with Understanding 191
Acknowledgments 197
References 197
- 8** Procedures Over Concepts: The Acquisition of Decimal
Number Knowledge 199
James Hiebert and Diana Wearne
- Decimal Number Knowledge 203
Conclusions 220
Acknowledgments 222
References 222
- 9** On Having and Using Geometric Knowledge 225
Alan H. Schoenfeld
- Overview 225
The Resolution of a False Dichotomy 241
Cognitive Underpinnings: The Relevant Literature 249
In the Classroom 256
Acknowledgments 263
References 263
- 10** Conceptual and Procedural Knowledge in Mathematics:
A Summary Analysis 265
Robert B. Davis
- What's Wrong with School Mathematics 265
Conceptual vs. Procedural Knowledge in Computers 295
Conclusion 298
References 298
- Author Index 301
- Subject Index 307
