

# SUMMARY

	Page
1      Introduction . . . . .	9
2      Background to reform . . . . .	13
3      Curricula . . . . .	17
3.1    Bodies responsible for reform . . . . .	17
3.2    General characteristics of the new programmes . . . . .	17
3.2.1   Place of the new mathematics syllabuses in the general school curricula . . . . .	17
3.2.2   General aims of the new syllabuses . . . . .	18
3.2.3   Internal structure of the new syllabuses . . . . .	19
3.2.4   How the new syllabuses are prepared . . . . .	21
3.3    Content . . . . .	21
3.3.1   Synthetic presentation . . . . .	21
3.3.2   Commentary on syllabus content . . . . .	24
4      Methodology of teaching . . . . .	27
4.1    General principles . . . . .	27
4.2    Methodology of the reformed teaching . . . . .	29
4.2.1   Prerequisites . . . . .	29
4.2.2   Games and functional approaches . . . . .	29
4.2.3   Situations . . . . .	29
4.2.4   Manipulation and creativity . . . . .	30
4.2.5   Abstraction . . . . .	31
4.2.6   Verbal expression . . . . .	32
4.2.7   Individualisation . . . . .	32
4.2.8   The teacher's share . . . . .	33
4.2.9   Teaching media . . . . .	33
5      The teaching body . . . . .	37
5.1    Profile of the new mathematics teacher . . . . .	37

5.2 Initial training . . . . .	38
5.3 Re-training (in-service training) . . . . .	38
5.3.1 Optional or compulsory? . . . . .	38
5.3.2 Duration . . . . .	39
5.3.3 Types of re-training. Training staff . . . . .	39
5.3.4 Target public . . . . .	40
5.3.5 Content of re-training courses . . . . .	40
6 Application measures . . . . .	43
6.1 Experiments . . . . .	43
6.1.1 Bodies entrusted with the experiments . . . . .	43
6.1.2 Experimental devices . . . . .	43
6.2 Generalisation . . . . .	44
6.2.1 Progress of generalisation . . . . .	44
6.2.2 Special arrangements made at the time of generalisation . . . . .	45
6.3 Evaluation . . . . .	46
6.3.1 Bodies responsible for evaluation . . . . .	46
6.3.2 Evaluation of pupils' progress . . . . .	47
6.3.3 Evaluation of teachers' contribution . . . . .	48
6.3.4 Teachers' evaluation of the new teaching . . . . .	49
6.3.5 Mathematicians' evaluation of the new teaching . . . . .	49
6.3.6 Parents' evaluation . . . . .	50
6.3.7 Recommendations resulting from the evaluations . . . . .	50
7 Conclusion . . . . .	51

## APPENDIX I

I Introduction . . . . .	59
II The use of experience and play for young children . . . . .	63
III Individualised and group learning . . . . .	71
IV The development from intuitive to more formalised work . . . . .	87
V The place of environmental and structural apparatus . . . . .	91

Appendix I List of schools visited . . . . .	97
Appendix II A selection of books noted in the schools . . . . .	99
Appendix III Number work . . . . .	101

## APPENDIX II

The 1968 Recommendations of the Education Ministers Conference (KMK) and the reform of mathematics teaching in the Federal Republic of Germany . . . . .	107
Reform of Mathematics Teaching in the Primary School: details and development . . . . .	110
In-service training of mathematics teachers in primary and lower-secondary schools in the <i>Land</i> of North Rhine-Westphalia . . . . .	113
Training of teachers for <i>Grundschulen</i> and <i>Hauptschulen</i> in the Federal Republic . . . . .	129
In-service training in the individual <i>Länder</i> . . . . .	132
Conclusions: Summing-up . . . . .	143
