

# Contents

<i>Preface</i>	vii
<i>Introduction</i> <i>John Monaghan</i>	1
<i>Part 1: The Curriculum</i>	
1. Introduction <i>John Berry</i>	13
2. The curriculum in the age of the CAS <i>Carl Leinbach</i>	17
3. The curriculum in a CAS environment <i>Carl Leinbach with Klaus Aspetsberger, Bärbel Barzel, Karl Fuchs, Helmut Heugl, Giora Mann, Andrew Rothery, Tatuya Sato and Fritz Schweiger</i>	21
4. The Influence of Computer Algebra in the Teaching and Learning of Mathematics <i>Helmut Heugl with Bärbel Barzel and Akio Furukawa</i>	32
5. Curriculum Change: evolution vs. revolution <i>Gloria Mann, Andrew Rothery and Tatsuya Sato</i>	39
6. Fundamental Ideas and Symbolic Algebra <i>Klaus Aspetsberger, Karl Fuchs and Fritz Schweiger</i>	45
7. Calculus Examples <i>Bärbel Barzel, Helmut Heugl, Andrew Rothery and Tatsuya Sato</i>	52

## *Part 2: Assessment*

- |   |    |
|---|----|
| 1. Introduction   | 61 |
| <i>John Berry</i>                                       |    |
| 2. Type, purpose and validity of assessment             | 63 |
| <i>Wade Ellis and Richard Browne</i>                    |    |
| 3. Examination Development                              | 71 |
| <i>Terence Etchells</i>                                 |    |
| 4. Coursework, Portfolios & Learning with Understanding | 76 |
| <i>Otto Wurnig and Stewart Townend</i>                  |    |

## *Part 3: The design of CAS written support material*

- |   |    |
|---|----|
| 1. Introduction   | 89 |
| <i>Josef Böhm</i>   |    |
| 2. Initial Considerations   | 90 |
| <i>Josef Böhm, Brian Denton, Robert Hill, Pam Norton<br/>and Nurit Zehavi</i> |    |
| 3. A consideration of resources currently used                                | 94 |
| <i>Josef Böhm, Brian Denton, Robert Hill, Pam Norton<br/>and Nurit Zehavi</i> |    |
| 4. Considerations for writers   | 99 |
| <i>Brian Denton and Robert Hill</i>   |    |

## *Part 4: Attracting Teachers to use CAS in the Classroom*

- |  |     |
|--|-----|
| 1. Introduction                          | 111 |
| <i>Lisa Townsley Kulich</i>              |     |
| 2. Confidence in computer algebra        | 115 |
| <i>Robert Nocker and Anthony Watkins</i> |     |

3.	Logistics for facilitating CAS instruction <i>Michael Beaudin and David Bowers</i>	126
4.	Overcoming legislative obstacles <i>Paul Marshall and Peter Schüller</i>	136
5.	Total resource management <i>David Bowers and Lisa Townsley Kulich</i>	146
6.	Attracting teachers to use computer algebra in the classroom: common strategies <i>Lisa Townsley Kulich</i>	153

### *Part 5: Understanding*

1.	Introduction <i>Paul Drijvers</i>	163
2.	Communication in the classroom with a CAS: the double didactic pyramid model <i>Jean-Philippe Drouhard</i>	165
3.	Current state of research into CAS in mathematics education <i>Robert Mayes</i>	171
4.	What issues do we need to know more about: Questions for future educational research concerning CAS. <i>Paul Drijvers</i>	190
