Section 1	INTRODUCTION	Page 1
Section 2	A REVIEW OF SELECTED RESEARCH FINDINGS AND RECOMMENDATIONS RELATED TO FEMALES AND MATHEMATICS	7
2.1	The factors that may influence girls in their choice to study mathematics	7
2.2	Visuo-spatial ability	9
2.3	Problem-solving ability	11
2.4	The view of mathematics as a masculine subject	13
2.5	Confidence and anxiety in learning mathematics	16
2.6	The perceived usefulness of mathematics	20
2.7	Treatment by teachers in the classroom	23
2.8	Subject choices and career advice	25
2.9	Attempts to change the situation for girls	27
2.10	Summary	30
Section 3	THE RESEARCH STUDY IN BRADFORD	32
3.1	The design of the investigation	32
3.2	Findings from the school survey	35
3.3	Findings from the questionnaire	38
3.31	Achievement at Ordinary level GCE	39
3.32	Attitudes to subjects studied in the fifth form	41
3.33	Advanced level subjects: choices and attitudes	44
3.34	Attitudes to mathematics	48
3.341	Usefulness of mathematics	48
3.342	Interest in mathematics	51
3.343	Confidence	52
3.35	Attitudes to sex-differences with respect to mathematics learning	53
3.36	Career intentions	55
3.37	Reasons given by students for not choosing mathematics	57
3.38	Experiences of students in learning mathematics	63
3.4	Findings from the interviews	70
3.5	Discussion and conclusions	87
Section 4	SUGGESTIONS FOR FURTHER RESEARCH AND METHODS OF CHANGING THE SITUATION	91
4.1	Research	91
4.2	Schools	92
