<b>1 What is street mathematics?</b>		<b>1</b>
I Introduction		1
II The significance of street mathematics		6
1 <i>Social factors in the emergence of street mathematics</i>		7
III Plan of the book		11
<b>2 Arithmetic in the streets and in schools</b>		<b>13</b>
I Introduction		13
II The cultural context		15
III The empirical study		17
1 <i>Subjects</i>		17
2 <i>Procedure</i>		18
3 <i>Results and discussion</i>		20
IV Further questions		26
<b>3 Written and oral arithmetic</b>		<b>28</b>
I Introduction		28
II The empirical study		30
1 <i>Experimental design</i>		30
2 <i>Subjects</i>		33
3 <i>Procedure</i>		33
4 <i>Results and discussion</i>		34
III Conclusions and further questions		47
<b>4 Situational representation in oral and written mathematics</b>		<b>49</b>
I Introduction		49
II Different views of schooling and cognitive development		50
III Fieldwork in mathematics: Farmers and students		56

IV	Carpenters and apprentices: Arithmetic for the shop and for school	62
V	Conclusions	74
5	<b>Situational and mathematical relations: A study on understanding proportions</b>	77
I	Introduction	77
II	A psychological analysis of the concept of proportions	78
III	Foremen and students: Social and learning contrasts	84
IV	Solving problems about proportions	87
V	Conclusions	101
6	<b>Reversibility and transfer in the schema of proportionality</b>	103
I	Proportionality in fishermen's everyday life	104
1	<i>Catching, processing, and selling fish</i>	104
2	<i>Seafood and other foods</i>	106
3	<i>Hypothetical models for fishermen's knowledge of proportions</i>	107
II	Reversibility and transfer of fishermen's knowledge of proportions	108
1	<i>Inversion and transfer of proportional relations in isomorphism of measures situations</i>	108
2	<i>Preservation of meaning in out-of-school strategies to solve proportions problems</i>	114
3	<i>A contrast between solving problems about fishing and about agriculture</i>	117
III	Strategies in solving proportions problems in and out of school	121
IV	Conclusions	126
7	<b>Reflections on street mathematics in hindsight</b>	127
I	Psychology and street mathematics	127
1	<i>Defining mathematical activities</i>	127
2	<i>Psychological processes in mathematizing situations</i>	132
II	Lessons for education	147
1	<i>Street mathematics in the classroom</i>	147
2	<i>Street mathematics, school mathematics, and critical thinking</i>	151
III	Final comments	153
