## AUTHOR'S PREFACE

1. INTRODUCTION	1
2. BINARY NUMBERS	
2.1 Introductory	5
2.2 The Decimal System	5
2.3 Other Systems	6
2.4 The Binary System	8
2.5 Binary Arithmetic Processes	9
2.6 Decimal-Binary and Binary-Decimal Conversion	12
2.7 Disguised Binary Systems	14
3. THE ALGEBRA OF CLASSES	
3.1 Introductory	16
3.2 Basic Definitions	16
3.3 Fundamental Laws	18
3.4 Important Consequences and Canonical Forms	21
3.5 Numerical Consistency	25
3.6 Simple Probabilities	29
4. THE CALCULUS OF PROPOSITIONS	
4.1 Introductory	32
4.2 Propositional Connectives	32
4.3 Truth Tables	33
4.4 Primitive Connectives	38
4.5 Multi-Valued Logic	40
5. SWITCHES AND SWITCHING ALGEBRA	
5.1 Introductory	42
5.2 Switches and Decision Elements	43

5.3	The Postulates of Switching Algebra	50
5.4	Theorems of Switching Algebra	51
5.5	Switching Functions of Two Variables	55
5.6	Switching Functions of More Than Two Variables	57
5.7	Non-Binary Switching Systems	59
<b>6.</b>	<b>BASIC SIMPLIFICATION METHODS</b>	
6.1	Introductory	62
6.2	A Simple Tabular Method	62
6.3	A Map Method	65
6.4	Further Tabular Methods	76
6.5	The Cranfield Method	83
6.6	Five Methods of Simplifying a Given Function	88
6.7	Graphical Complementation	93
<b>7.</b>	<b>GEOMETRICAL REPRESENTATION IN <math>N</math>-SPACE</b>	
7.1	Introductory	96
7.2	Functions of One and Two Variables	96
7.3	Functions of Three Variables	99
7.4	Functions of Four Variables	108
7.5	Functions of $N$ Variables	110
7.6	Similar Switching Functions	114
<b>8.</b>	<b>SYMMETRIC FUNCTIONS</b>	
8.1	Introductory	117
8.2	Definition and Description	117
8.3	Symbolic Representation	121
8.4	Symmetric Functions and the Karnaugh Map	124
8.5	Symmetric Functions as Spheres in $N$ -Space	128
8.6	Iterative Networks	131
<b>9.</b>	<b>LATTICES</b>	
9.1	Introductory	134
9.2	The Postulates of a Lattice	134
9.3	Lattice Properties	138
9.4	Partial Ordering	140
	<b>INDEX</b>	<b>145</b>
