Contents

Chapter 1: **Introducing Logo and the Apple®** 1

The Logo Language • What Is Programming? • Hardware Required to Run Logo • Software Required to Run Logo • Using Diskettes • Starting Up Logo • The Apple® Keyboard • Booting Logo • Getting Started

Chapter 2: **Basic Turtlegraphics** 13

Finding the Turtle • Changing the Turtle's Position • Drawing a Simple Figure • Building More Complex Patterns • Properties of the Turtle • Commands and Operations as Procedures • The Apple® Logo Screen Display • In Review

Chapter 3: **Creating Procedures with the Logo Editor** 40

Writing Simple Programs • Expanding Logo's Vocabulary • Text Editing • The Logo Editor • Using the Editor • Errors and Debugging • Modularization—Building Complex Procedures from Simple Ones • Teaching the Turtle to Make a Pyramid • Workspace Management • Obtaining Printed Copies of Programs • Obtaining Printed Copies of Graphics Images • In Review

Chapter 4: **Variables, Arithmetic, and Communication Between Procedures** 75

Arithmetic Operations • Naming Data • Passing Information to a Procedure • Passing Information to Lower-Level Procedures • Returning Information from a Procedure • In Review

Chapter 5: **Conditionals and Recursion** 104

Conditional Expressions • The Nature of Recursion • Recursion Using Inputs • Drawing More Complex Figures • Using

Recursion to Draw Solid Figures • Two-Level Recursion • Recursion with Random Numbers • Recursive Trees • Turtle Moves as Vectors • In Review

Chapter 6: **Characters, Words, and Lists** 141

Words and Characters • Lists • Retrieving Lists and Characters from the Keyboard • Taking Logo Objects Apart • Using Recursive Procedures to Process Lists • Recursive Calls from an Output Procedure • Assembling Words into Lists • Assembling Characters into Words • Additional Predicates for Processing Words and Lists • Using Association Lists • In Review

Chapter 7: **Mathematical Applications for Lists** 175

Summing a List of Numbers • Averaging a List of Numbers • Finding Extreme Values in a List • Operating on Internal Numbers in a List • Sorting a List of Numbers • Randomly Ordering a List • Saving Your Tools • Using Property Lists • Displaying a List of Numerical Data • In Review

Chapter 8: **Nonmathematical List Applications** 213

Writing Newspaper Headlines • Computer-Generated Poems • A Spanish Vocabulary Drill • Printing Output in Columns • Electric Bill Simulation • Technological Progress, or How to Replace a Five-Dollar Calculator with a Fifteen-Hundred-Dollar Computer • In Review

Chapter 9: **Newton's Turtle** 250

The Inertial Turtle • More Linear Motion—Gravity • Combining Two Motions • The Oscillating Turtle • Placing the Turtle in Orbit • In Review

Chapter 10: **Advanced File Handling Applications** 282

Memory Management and Filing within Programs • Handling Large Programs • Rules for Erasing Procedures within Procedures • Running an Overlaid Program • Saving Data • Creating a Phone Directory • Caveats

Appendix A: **Logo Procedure Library** 305

Appendix B: **The ASCII Coding System** 310
