Preface by *Neil R. Thomson & James F. Barker* v

1 Groundwater Quality

A global inventory of groundwater quality: first results *Jasper Griffioen, Rianne Brunt, Slavek Vasak & Jac Van Der Gun* 3

Groundwater quality in Canada: a national overview *Suzanne Lesage* 11

Cumulative factors affecting groundwater quality in domestic wells in Finland *Kirsti Korkka-Niemi* 19

Urbanization of rural watersheds in the region of Waterloo: implications for water quality *Randy L. Stotler, Jon Paul Jones, Shaun K. Frape, Robert J. Drimmie, Craig T. Johnston & Ian Judd-Henry* 29

Burial sites and their impact on groundwater *Julian Trick, Ben Klinck, Patricia Coombs, Dave Noy & Geoff Williams* 36

Quality of water from hand-dug wells, boreholes, and streams in two localities in southwest Nigeria: implications for incidence of water borne diseases *Samson Ayanlaja, O. O. Kehinde-Phillips, Francis Ogunkolo, Bunmi Dada & B. A. Senjobi* 44

Groundwater quality trend detection at the regional scale: effects of spatial and temporal variability *H. P. Broers, J. Rozemeijer, M. Van De Aa, B. Van Der Grift & E. A. Buijs* 50

2 Contaminant Input Processes

Evaluating diffuse groundwater pollution trends—a key challenge for the new EC water directives *Stephen Foster* 63

Indicators for assessing transport of oil sands process-affected waters *Michael MacKinnon, Grey Kampala, Bill Marsh, Phil Fedorak & Selma Guigard* 71

Herbicide runoff on a pastoral hill slope—a case study *Karin Müller, Roland Stenger & Anis Rahman* 81

Dynamics of groundwater recharge through structured soils and the influence on water quality *Edwin Cey, David Rudolph & René Therrien* 89

Assessing water travel times during riverbank filtration *Melissa Dawe & Kerry MacQuarrie* 97

Investigating surface water–groundwater interactions with the help of sewage indicators in Berlin, Germany <i>Gudrun Massmann, Uwe Dünmbier, Janek Greskowiak, Andrea Knappe & Asaf Pekdeger</i>	103
Fate and transport of phage as surrogates for viral pathogens in UK aquifers <i>Eadaoin Joyce, Katie Collins, Aidan Cronin, Joerg Rueedi, Steve Pedley, Alwyn Hart, John Tellam & Richard Greswell</i>	113
Effects of macropore flow on solute transport in a vadoze zone under repetitive rainfall events <i>Fumi Sugita, Tokuo Kishii & Michael English</i>	122
Factors controlling the chemistry of shallow groundwater in different geological and hydrological environments <i>Irén Varsányi, Hélène Pauwels & Lajos Ó.Kovács</i>	130
Impact of a polluted stream on its adjacent aquifer: the case of the Alamar zone, Tijuana, Mexico <i>Fernando T. Wakida, Luis E. Ponce-Serrano, Eulalia Mondragon-Silva, E. Garcia-Flores, David N. Lerner & Guillermo Rodriguez-Ventura</i>	141
The influence of relative permeability heterogeneity on DNAPL releases <i>G. P. Grant, J. I. Gerhard & B. H. Kueper</i>	148
3 Site Characterization	
Characterization of Quaternary gravel aquifers and their implementation in hydrogeological models <i>Uli Maier, Andreas Becht, Boris Kostic, Claudius Bürger, Peter Bayer, Georg Teutsch & Peter Dietrich</i>	159
Geostatistical evaluation of high frequency hydraulic property and groundwater quality data collected by the Waterloo Profiler <i>Shane McDonald, Jeff Groncki & Susanne Biteman</i>	169
Quantification of PCE mass flow rates for source zone identification <i>Sebastian Bauer, Marti Bayer-Raich, Christian Kolesar, Dietmar Müller, Thomas Holder & Thomas Ptak</i>	176
Characterization of transport processes in a heterogeneous aquifer using electrical resistivity tomography (ERT) <i>Kerstin Müller, Jan Vanderborght, Andreas Englert, Andreas Kemna & Harry Vereecken</i>	182
Contaminant retardation by double-porosity diffusive exchange in the Chalk: implications for monitoring <i>William Burgess, John Barker, Sally Watson & Ben Fretwell</i>	191
Real and apparent thickness relationship for gasoline and gasohol contamination <i>Alexandra Finotti, Nelson Caicedo, Everton De Oliveira & José Luiz Zoby</i>	197

Detection and characterization of a vinyl chloride plume inside an urbanized area 203
Alessandro Gargini & Monica Pasini

Wettability effects on the natural remobilization of mixed DNAPL pools 212
James W. Roy, James E. Smith & Robert W. Gillham

4 Management and Decision Making

Impacts of changing agricultural land-use practices on municipal groundwater quality: Woodstock, Ontario 223
Claus P. Haslauer, David L. Rudolph, Neil R. Thomson, Rob Walton & Margaret Misk-Evans

Developing a farm wellhead protection plan 234
Hugh Simpson & James Myslik

Managing basin-wide groundwater quality changes resulting from enhanced groundwater recharge programs 241
N. Thomas Sheahan, W. Greg Hamer & David S. Gould

Risk-based design of cost-efficient remediation strategies at megasites 249
Fabio Serapiglia, Judith Sievers & Michael Finkel

IMS—A risk-based management approach for megasites, example Bitterfeld megasite, Germany 256
Jochen Großmann, Judith Sievers, Antje Ritter & Martin Keil

Macro and micro scale evaluation of contaminant plumes at Aberdeen Proving Ground 262
Donald J. Green

5 Natural Attenuation Processes and Applications

SIReN: Site for innovative research on monitored natural attenuation 269
Sarah Macnaughton, Richard Swannell, Gordon Lethbridge, Philippa Scott, Graham Norris, Nicola Harries, Alwyn Hart & Jonathan Smith

Assessing measurements of first-order degradation rates through the virtual aquifer approach 274
Sebastian Bauer, Christof Beyer & Olaf Kolditz

Investigations of a large TCE plume discharging to surface water 282
Steven Chapman, Beth Parker & John Cherry

Assessment of stable carbon isotopes as a tool for assessing MTBE biodegradation at a field site 290
Luis E. Lesser, Gerard Spinnler, Paul C. Johnson & Ramon Aravena

Natural attenuation of volatile hydrocarbons in the unsaturated zone—modelling for the Værløse field site 296
Uli Maier, Uli Mayer & Peter Grathwohl

Fate and transport of naphthenic acids in groundwater <i>Francoise Gervais & James Barker</i>	305
Wetlands as natural reactive barriers: the hydrological and geomorphological landscape perspective <i>Seiichiro Ioka & Norio Tase</i>	311
Steady state plumes: transverse mixing in aquifers, numerical experiments and field scale predictions for natural attenuation <i>Uli Maier, Hermann Rügner & Peter Grathwohl</i>	317
Modelling a controlled-sourced, multichemical plume undergoing natural attenuation <i>Caitlin Martin, Hugh McCreddie, John W. Molson & Jim Barker</i>	326
Tracing landfill leachate impacts on groundwater using DOC geochemistry and $\delta^{13}\text{C}$ measurements <i>Hossein Mohammadzadeh, Ian Clark & Gilles St-Jean</i>	332
Natural attenuation of N-S-O heteroaromatic compounds in groundwater: chemical analyses, reactive transport experiments and field studies <i>Matthias Piepenbrink, Martina Krüger, Thomas Ptak & Peter Grathwohl</i>	338
6 In Situ Remediation	
<i>In situ</i> groundwater clean-up of MTBE by photocatalysis <i>May Chan, Alex Orlov, Richard Lambert & Rod Lynch</i>	349
Spatial variations in MTBE-biodegradation activity near a biobarrier in Port Hueneme, California <i>Luis E. Lesser & Paul C. Johnson</i>	358
Sequential reactive barrier remediation of ammonium-contaminated groundwater using polymer mats <i>Bradley M. Patterson, Michelle E. Grassi, Blair Robertson, Gregory B. Davis & Allan J. McKinley</i>	367
Separating the kinetic and sorption parameters of nitroaromatic compounds in contact with granular iron <i>Melissa Marietta & John F. Devlin</i>	376
Investigation of the performance of organic carbon permeable reactive barriers using dissolved gas analysis <i>Randi L. Williams, K. Ulrich Mayer, Rich T. Amos, David W. Blowes & Carol J. Ptacek</i>	383
Adsorption of natural organic matter and its effects on TCE degradation by iron PRBs <i>Stefano Marconetto, Lai Gui & Robert Gillham</i>	389
<i>In situ</i> chemical oxidation test of organic solvents with potassium permanganate <i>Salvador Jordana, Jordi Guimerà, Josep A. Domènec & Josep M. Subirana</i>	398
A meso-scale constructed wetland for the remediation of chlorobenzene contaminated groundwater <i>Arno Kaschl, Andrea Schultz, Carsten Vogt, Falk Dorusch, Peter Popp, Helko Borsdorf, Eberhard Küster, Peter Kuschik, Matthias Kästner & Holger Weiß</i>	404

On-site landfill leachate management in a headwater catchment <i>Brian Beatty & Joanne Thompson</i>	412
Surfactant enhanced air sparging in Borden sand <i>Gordon H. Brown, Michael D. Annable, Jaehyun Cho & Heonki Kim</i>	418
Remediation of bromate contaminated groundwater <i>Ray Butler, E. Cartmell, A. Godley & L. Lytton</i>	426
Remediation of groundwater contaminated by trichloroethylene using groundwater extraction and effects of natural attenuation <i>Nobuyuki Egusa, Tatemasa Hirata, Masanori Yoshioka & Osami Nakasugi</i>	433
7 Flow and Transport Modelling	
Pesticide transport in groundwater at the national scale: coupling an unsaturated zone model with a groundwater flow model <i>Aaldrik Tiktak, Ton Van Der Linden & Gerard Uffink</i>	441
Stochastic modelling of well head protection zones in highly heterogeneous aquifers <i>Monica Riva, Laura Guadagnini, Eugeniu Martac & Thomas Ptak</i>	449
An adaptive hybrid method of characteristics technique for solving solute transport problems <i>Jianmei Cheng, Danhong Huang & Jianming Chen</i>	458
Modelling groundwater/surface water interactions using MODFLOW-WhaT <i>R. Brad Thoms & R. L. Johnson</i>	466
A fully-coupled approach to evaluate the effectiveness of tile-drain systems to control drainage water and salinity <i>George B. Matanga, Claire Jacquemin & Don Demarco</i>	473
How old is the water? Simulating groundwater age at the watershed scale <i>J. W. Molson & E. O. Frind</i>	482
Large-scale groundwater flow and transport modelling: methodology and application to the Meuse Basin, Belgium <i>Philippe Orban, Serge Brouyere, Horatiu Corbeanu & Alain Dassargues</i>	489
Delineation of well head protection areas for wells in Urmia Plain, Iran, using WhAEM2000 <i>K. Badv & M. Deriszadeh</i>	496
Surface and groundwater qualities in an urbanized catchment: scenario from a developing country <i>Moshood N. Tijani & Shin-Ichi Onodera</i>	506
Applying a laboratory-scale biodegradation concept to model field-scale reactive transport with advanced numerical methods <i>Sascha E. Oswald, Ian A. Watson, Roger S. Crouch & Steven A. Banwart</i>	517

Numerical simulation of density-driven permanganate oxidation of trichloroethylene DNAPL in a sandy aquifer <i>Thomas H. Henderson, K. Ulrich Mayer, Beth L. Parker & Tom A. Al</i>	525
An object-oriented groundwater/river model <i>Olaf Kolditz, Martin Beinhorn & Rudolf Liedl</i>	531
Key word index	541
Author index	545
