

CONTENTS

Preface	ix
The importance of landscape ecology for woodland policy: current issues and research priorities S.A. Bailey and S.N. Pryor	1
SESSION 1. RESPONSES OF PLANTS TO LANDSCAPE-SCALE PROCESSES	
Meso-scale floristic richness of ancient woodland indicator species: woodland type and landscape effects G. Mouflis and G.P. Buckley	11
Metapopulation dynamics in changing landscapes: a new spatially-realistic model applied to forest plants in central Lincolnshire, United Kingdom K. Verheyen, M. Vellend, H. Van Calster, G. Peterken and M. Hermy	19
Does pesticide spray drift and fertiliser over-spread have impacts on the ground flora of ancient woodland margins? B. Gove, J. Ghazoul, S.A. Power and G.P. Buckley	27
Ecological continuity and spatio-temporal connectivity: modelled response of the lichen <i>Bryoria furcellata</i> to landscape dynamics J.C.E. Hope and J.W. Humphrey	35
Modelling long-distance seed dispersal across fragmented landscapes T.P. Dawson, P.M. Berry, P.A Harrison and R.G. Pearson	43
Deer as vectors of plant dispersal in woodland networks A.E. Eycott, A.R. Watkinson and P.M. Dolman	50
SESSION 2. RESPONSES OF ANIMALS TO LANDSCAPE-SCALE PROCESSES	
The bird communities of small woods: the influence of landscape context and changes in woodland structure P.E. Bellamy and S.A. Hinsley	61
Spatial arrangement of woody habitats and the distribution of birds and butterflies in agricultural landscapes in the Netherlands W. Geertsema, A. Schotman, H. Meeuwssen, C. van Swaay and C. van Turnhout	69
Simulating population viability in fragmented woodland: nuthatch (<i>Sitta europaea</i> L.) population survival in a poorly wooded landscape in eastern England J. Alderman, D. McCollin, S. Hinsley, P. Bellamy, P. Picton and R. Crockett	76

Using a multi-scale model for identifying priority areas in capercaillie (<i>Tetrao urogallus</i>) conservation R.F. Graf, K. Bollmann, W. Suter and H. Bugmann	84
The persistence of a key butterfly species <i>Boloria selene</i> (small pearl-bordered fritillary) in Clocaenog Forest and the impact of landscape-scale processes. K.E.J. Stewart, N.A.D. Bourn, K. Watts and M. Griffiths	91
Ancient woodland in the developing landscape: the effects of fragmentation and isolation on carabid assemblages B. R. Allen, A. H. Fielding and C. P. Wheeler	99
Landscapes with ancient trees: invertebrate mobility and population viability K.N.A. Alexander	107
SESSION 3. LANDSCAPE THRESHOLDS	
Landscape-level requirements for the conservation of woodland birds: are there critical thresholds in habitat cover? A.F. Bennett and J.Q. Radford	117
Thresholds of environmental sustainability: the case of woodlands R. Haines-Young and M. Potschin	125
Exploring structural connectivity in Welsh woodlands using neutral landscape models K. Watts and M. Griffiths	133
SESSION 4. POTENTIAL OF TREES TO REDUCE IMPACTS FROM FARMING	
The role of trees in landscape planning to reduce the impacts of atmospheric ammonia deposition M.A. Sutton, U. Dragosits, M.R. Theobald, A.G. McDonald, E. Nemitz, J.F. Blyth, R. Sneath, A. Williams, J. Hall, W.J. Bealey, R.I. Smith and D. Fowler	143
Investigating the impact of tree shelter belts on agricultural soils Z.L. Carroll, S.B. Bird, B.A. Emmett, B. Reynolds and F.L. Sinclair	151
SESSION 5. ASSESSING THE RESOURCE	
Ecological change in British broadleaved woodlands between 1971 and 2000: a pilot re-survey of 14 of the 103 'Bunce survey' sites S.M. Smart, H.J. Black, R.G.H. Bunce, K. Kirby, R. Isted, P.M. Corney, F. Bunce and D. Singleton	161
Veteran trees in the landscape: a methodology for assessing landscape features with special reference to two ancient landscapes M. Smith and R.G.H. Bunce	168

Assessing the vulnerability of forests to environmental change A.C. Newton, K. Wilson and C. M. Echeverria	176
SESSION 6. SPATIAL CONSERVATION STRATEGIES	
Space for nature: developing landscape-scale action for woodland biodiversity R.J. Smithers	187
Historic parks in the wider landscape D.J. Bullock, K.A. Fretwell and A. Wainwright	195
The capercaillie as indicator of high species richness: potential and limitations of the umbrella species concept K. Bollmann, R.F. Graf, R. Debrunner and W. Suter	200
Applying landscape ecological methods to analyse and design ecological networks. Sabine van Rooij, Theo van der Sluis, Eveliene Steingröver and Stephen Clarke	208
Developing Forest Habitat Networks in southern Scotland D. Ray, K. Watts, J. Hope and J. Humphrey	216
Development of a forest habitat network for Wales: linking research with policy J. Latham, K. Watts, C. Thomas and M. Griffiths	224
AONBs in the South East: landscape-scale action for woodland fritillary butterflies P.T. McKernan	232
Forest habitat network development in the West Weald Woods A.M. Whitbread and S.E. McKenzie	240
Habitat re-creation and restoration at the landscape scale: woodlands in Wales G.H.Griffiths, A.M.Strange, S. Warnock, J.R.Porter and C. Burrows	248
Wildlife corridors and beyond: seeing the wood for the trees in conservation delivery R.D.J. Catchpole	255
Balancing site-based protection versus landscape-scale measures in English woodland K.J. Kirby	263
SESSION 7. LANDSCAPE-SCALE ACTION	
Achieving landscape-scale change: the National Forest, a case study S. Evans	273
Putting theory into practice R. Leslie	281

Policy implications of landscape-scale action for trees and forests in the UK Hilary M. Allison	288
POSTER PAPERS	
Effects of fertiliser drift at ancient woodland edges S.M. Bateman, R. Field and R.J. Smithers	297
Bats in the United Kingdom, a landscape scale perspective: considering the importance of habitat connectivity and the threats posed by fragmentation A. Cowan and R.M. Crompton	301
The UK Biodiversity Research Advisory Group (BRAG) R. Ferris	305
Forest modelling based on landscape ecology concepts C. Gaucherel, D. Fleury, D. Auclair, J. Baudry and P. Dreyfus	309
Modelling natural restoration potential of marginal olive groves in south Spain J.R. Guzmán-Álvarez and R.M. Navarro-Cerrillo	313
New machine learning tools for predictive vegetation mapping after climate change: Bagging and Random Forest perform better than Regression Tree Analysis L.R. Iverson, A.M. Prasad and A. Liaw	317
Integrating indicators of biodiversity into a tool to enhance participatory planning of landscape change: a component of the VisuLands project C.P. Quine	321
Priority woodland in the landscape for two bat BAP species: the importance of ancient trees and woodlands Alison Rasey	325
Once and future veterans in farmland around historic parks: two examples S Rowe, S Barker, DJ Bullock and N Walmsley	329
Landscape ecology of woody tree and scrub species in hedgerows and woodland edges. Assumptions on relations between landscape composition and species occurrence, based on a field-study I.L. Sarlöv Herlin	332
Ancient woodland restoration in the south-east Midlands: four years of learning K.G. Stannard	336
Phytochemistry of Scots pine as a driver of spatial heterogeneity in insect herbivore and broader diversity in a native woodland landscape J. Stockan, P. Dennis, V. Thoss, G. Iason and J. Beaton	340

Pan-European ecological networks and European target species T. van der Sluis, M. Bloemmen and I. Bouwma	344
Use of computer visualisation in woodland landscape analysis: available tools, practical issues and potential applications S.McG. Wilson	346
POSTER ABSTRACTS	
Woodscape: delivering ancient and native woodland restoration in south east England's public forests S. Abbott and J. Doyle	353
Mapping a future for ancient trees J.E. Butler	354
Fragmentation effects on the state of conservation of forest and shrub ecosystems in "Sierra de Guadarrama" future National Park (Madrid, Spain) T. Gil Gil and P. Fernández Sañudo	355
Studies into the application of a landscape-scale management framework for woodland in Wales J. Latham, A. Lucas and J. Rothwell	356
Targeting the re-creation of woodland habitats in a fragmented landscape H. Lyons and L. Tricker	357
The application of landscape analysis to identify priority woodlands for red squirrel (<i>Sciurus vulgaris</i>) conservation in Scotland. L. Poulson, M. Griffiths, A. Broome and B. Mayle	358
Investigating long term changes in woodland bird populations K.W. Smith, R.J. Fuller and D.G. Noble	360
Pollinator turnover in ancient woodland fragments A. Stott	362
The ecology and conservation potential of "clough" woodlands within the dark peak natural area of the peak district national park, UK. I. The woodlands of the dark peak: creation of a natural area woodland GIS J.P. Winn	363
