

CONTENTS

Summary	4
1. DSM-Agro Geleen site situation	4
2. Grande Paroisse ammonium nitrate pipe reactor	5
2.1. Capacity range	5
2.2. General process description	5
2.3. Process steam treatment (purification)	6
3. DSM-Agro Geleen experience	8
3.1. Capacity and flexibility	8
3.2. Environmental impact	9
3.2.1. Vapour treatment	9
3.2.2. Concentration unit	10
3.3. Energy consumption	10
3.4. Corrosion aspect	11
3.5. Safety analysis	11
3.5.1. Lessons from Terra Port Neal incident	11
3.5.2. DSM internal recommendations	12
3.5.3. Advantage of the pipe reactor	13
4. New developments in condensate treatment: zero liquid emission	13
5. Conclusion	15
Related Proceedings of the Society	16

Key words: Ammonium nitrate, Pipe reactor.
