

Contents

1. INTRODUCTION	1
2. BACKGROUND.....	1
3. OBJECTIVES OF THE CONSULTATION	2
4. SUMMARY OF THE PROCEDURES AND GENERAL DISCUSSIONS	2
5. RISK ASSESSMENT OF <i>SALMONELLA</i> SPP. IN BROILER CHICKENS AND EGGS	4
5.1 INTRODUCTION.....	4
5.2 SCOPE OF THE RISK ASSESSMENT.....	4
5.3 APPROACH TAKEN.....	5
5.3.1 Hazard identification and hazard characterization.....	5
5.3.2 Risk characterization for <i>Salmonella</i> Enteritidis in eggs	5
5.3.3 Risk characterization of <i>Salmonella</i> spp. in broiler chickens.....	6
5.4 KEY FINDINGS OF THE RISK ASSESSMENT	6
5.4.1 Hazard characterization for <i>Salmonella</i>	6
5.4.2 Risk characterization for <i>Salmonella</i> Enteritidis in eggs	6
5.4.3 Risk characterization of <i>Salmonella</i> spp. in broiler chickens.....	8
5.5 LIMITATIONS AND CAVEATS INCLUDING UNCERTAINTY AND VARIABILITY	8
5.5.1 Hazard characterization for <i>Salmonella</i> spp.....	9
5.5.2 Risk characterization of <i>Salmonella</i> Enteritidis in eggs.....	9
5.5.3 Risk characterization of <i>Salmonella</i> spp. in broiler chickens.....	10
5.6 GAPS IN THE DATA	10
5.6.1 Hazard characterization.....	10
5.6.2 Exposure assessment of <i>Salmonella</i> Enteritidis in eggs	11
5.6.3 Exposure assessment of <i>Salmonella</i> spp. in broiler chickens.....	11
5.7 RESPONSE TO THE SPECIFIC RISK MANAGEMENT QUESTIONS POSED BY THE CODEX COMMITTEE ON FOOD HYGIENE.....	12
5.7.1 Estimation of the risk from pathogenic <i>Salmonella</i> spp. consequential to a range of levels for the general population and for various susceptible population groups. (elderly, children, immunocompromised patients).....	13
5.7.2 The effect of specific management interventions on the risk posed by <i>Salmonella</i> Enteritidis in eggs.	13
5.7.3 The effect of specific management interventions on the risk posed by <i>Salmonella</i> spp. in broiler chickens.	15
5.8. CONCLUSIONS AND RECOMMENDATIONS.....	17
6. RISK ASSESSMENT OF <i>LISTERIA MONOCYTOGENES</i> IN READY-TO-EAT FOODS	18
6.1 INTRODUCTION.....	18
6.2 SCOPE OF THE RISK ASSESSMENT.....	18
6.3 APPROACH TAKEN.....	19
6.3.1 Hazard identification.....	19
6.3.2 Exposure assessment	20
6.3.3 Hazard characterization.....	21
6.3.4 Risk characterization.....	22
6.4 KEY FINDINGS OF THE RISK ASSESSMENT	22
6.4.1 General.....	22
6.4.2 Exposure assessment	23
6.4.3 Hazard characterization.....	23
6.4.4 Risk characterization.....	23
6.5 LIMITATIONS AND CAVEATS INCLUDING UNCERTAINTY AND VARIABILITY	24
6.5.1 Modelling	24
6.5.2 Prevalence and cell number	24
6.5.3 Consumption characteristics	24
6.5.4 Modelling of dose-response.....	25
6.5.5 Modelling of microbial growth.....	25
6.6 GAPS IN THE DATA	25
6.7 RESPONSE TO THE SPECIFIC RISK MANAGEMENT QUESTIONS POSED BY THE CODEX COMMITTEE ON FOOD HYGIENE.....	26

6.7.1 Evaluation of the risk from <i>Listeria monocytogenes</i> to susceptible population groups compared to the general population	26
6.7.2 Risk from <i>Listeria monocytogenes</i> in food when the number of organisms does not exceed a specified level at the point of consumption.	27
6.7.3 Risk from <i>Listeria monocytogenes</i> in foods that support growth and do not support growth under specific storage conditions and shelf-life.	29
6.8 CONCLUSIONS AND RECOMMENDATIONS	29
7. APPLICABILITY OF THE RISK ASSESSMENT WORK	30
7.1 INTRODUCTION.....	30
7.2 APPLICABILITY: TRAINING AND CAPACITY BUILDING.....	30
7.3 APPLICABILITY: UNDERTAKING RISK ASSESSMENTS.....	31
7.3.1 Adaptability of the exposure assessment component.....	31
7.3.2 Adaptability of the hazard characterization component.....	31
7.3.3 Other applications of the FAO/WHO risk assessment documents.....	32
8. OVERALL CONCLUSIONS OF THE EXPERT CONSULTATION	32
9. RECOMMENDATIONS.....	33
ANNEX 1: PARTICIPANTS	35
EXPERTS.....	35
MEMBERS OF THE EXPERT DRAFTING GROUPS	35
<i>Listeria monocytogenes</i> in ready-to-eat foods.....	35
<i>Salmonella</i> spp. in broiler chickens and eggs	35
JOINT FAO/WHO SECRETARIAT.....	36
RESOURCE PEOPLE	36
ANNEX 2: JOINT FAO/WHO MICROBIOLOGICAL RISK ASSESSMENT ACTIVITIES.....	37
ANNEX 3: LIST OF WORKING DOCUMENTS	38
