

CONTENTS

List of Mathematical Definitions	<i>x</i>
List of Theorems	<i>xii</i>
List of Corollaries	<i>xiii</i>
List of Lemmas	<i>xiv</i>
Preface	<i>xvii</i>
Chapter 1: Introduction	1
Chapter 2: Simple Kriging	7
Properties of Linear Combinations of Variates	8
Assumptions and Definitions	11
The Estimation Variance	11
Normal Equations	14
Minimum Mean Square Error	15
Algorithm	16
EXERCISE 2.1	18
Properties	20
EXERCISE 2.2	27
Chapter 3: Normalization	31
Comparing Two Distributions	31
EXERCISE 3.1	32
Normal Score Transformation	33
Simple Kriging of Normal Scores	35
EXERCISE 3.2	35
Chapter 4: Ordinary Kriging	39
Assumptions	39
Important Relationships	40
The Estimator	43
The Estimation Variance	43
The Optimization Problem	44
Minimum Mean Square Error	46
Algorithm for Intrinsic Random Functions	47

Second Order Stationary Ordinary Kriging	48
EXERCISE 4.1	52
Properties	53
Relating Simple and Ordinary Kriging	59
Search Neighborhood	62
Quasi-Stationary Estimator	63
Chapter 5: The Semivariogram	67
The Semivariogram of the Random Function	68
The Experimental Semivariogram	70
EXERCISE 5.1	74
Anisotropy and Drift	75
Semivariogram Models	76
Additivity	80
Parameter Estimation by Trial and Error	81
Automatic Parameter Fitting	83
EXERCISE 5.2	86
Support	89
Direct Applications	89
Chapter 6: Universal Kriging	91
The Estimator	91
Assumptions	92
Unbiasedness	94
Estimation Variance	96
Optimization	98
Minimum Mean Square Error	100
Algorithm for Intrinsic Stationary Residuals	102
Second Order Stationary Universal Kriging	103
Practice	107
EXERCISE 6.1	108
Chapter 7: Crossvalidation	115
Alternative Evaluation Method	115
EXERCISE 7.1	117
Diagnostic Statistics	119
EXERCISE 7.2	121
Chapter 8: Drift and Residuals	129
Assumptions	129
Unbiasedness	130
Estimation Variance	132
Optimal Estimator	133
Minimum Estimation Variance	135
Algorithmic Summary	136
Residuals	137
EXERCISE 8.1	137

Chapter 9: Stochastic Simulation	141
Sequential Gaussian Simulation	143
EXERCISE 9.1	147
Simulated Annealing	147
EXERCISE 9.2	152
Advantages and Disadvantages of Simulated Annealing	154
Lower-Upper (LU) Decomposition	155
The Turning Bands Method	158
Chapter 10: Reliability	163
Kriging Under Normality of Errors	164
EXERCISE 10.1	165
Indicator Kriging	167
EXERCISE 10.2	171
Stochastic Simulation	173
EXERCISE 10.3	175
Comparisons	177
Chapter 11: Cumulative Distribution Estimators	179
Simulation E-type Estimator	179
EXERCISE 11.1	180
Indicator E-type Estimator	182
Loss Functions	184
Chapter 12: Block Kriging	187
The Estimator	188
Assumptions	188
Estimation Error	191
Normal Equations	193
Covariance Modeling	197
EXERCISE 12.1	198
EXERCISE 12.2	202
Remarks	204
EXERCISE 12.3	206
Chapter 13: Ordinary Cokriging	209
The Estimator	209
Assumptions	210
Unbiasedness	212
Estimation Error	213
Optimization	217
Minimum Mean Square Error	219
Algorithm	220
Structural Analysis	221
EXERCISE 13.1	226
Regionalized Compositions	234

Chapter 14: Regionalized Classification 237

 Typification 238

 Ward’s Method 239

 Discriminant Analysis 243

 Allocation by Extension 247

 EXERCISE 14.1 248

References 261

Appendix A: West Lyons Field Sampling 267

Appendix B: High Plains Aquifer Sampling 269

Appendix C: UNCF Sampling 279

Appendix D: Dakota Aquifer Sampling 281
