

# Table of Contents

List of Tables	xi
Foreword	xv
Preface	xvii
<b>PART ONE: BOOKS OF MEDICAL INSTRUCTION</b>	<b>1</b>
Section I. Introduction	3
1. Semiotics and medicine: A brief overview	3
Selected list of twentieth century works in medical symptomatology and medical semiotics	7
2. Outline of argument: <i>homo medicabilis</i> defined	10
Section II. Eight Books of Medical Instruction	16
1. Selection criteria	16
2. Coded list of selected books	16
3. Dissemination of the selected books of medical instruction in North America	17
4. The historical context: 'Genealogies' of the selected books	21
5. The critical context: Critical reviews of the selected books	28
<b>PART TWO: A SEMIOTIC COMPARISON OF TEXTBOOKS OF     MEDICINE AND POPULAR HOME MEDICAL BOOKS</b>	<b>35</b>
Section I. Explanation of Technical Terms and Methods of Analysis	37
1. Semiotics	37
2. Linguistics	37
3. Linguistic properties	37
4. Segments	38
5. Elements	38

6. Selected Headings	39
7. Schemata	39
8. Disease Descriptions	39
9. Terms for aberrant states, or for indicators of aberrant states	39
10. Sentences of pragmatic instruction	40
11. Methods of semiotic analysis described	40
12. Rationale underlying selection of elements for analysis	42

Section II. Semiotic Analyses of the Segments	46
---	----

1. The Text	46
-------------	----

Supplement A	87
--------------	----

2. The Table of Contents	98
--------------------------	----

Supplement B	137
--------------	-----

3. The Paratext	186
-----------------	-----

Supplement C	199
--------------	-----

PART THREE: CONCLUSIONS	227
-------------------------	-----

Section I. Differences in Form	229
--------------------------------	-----

1. Nondiscursive elements	229
---------------------------	-----

2. Differences in the distribution of certain grammatical and other semiotic elements	229
---	-----

3. Differences in paratextual components	232
--	-----

4. Differences in style	233
-------------------------	-----

Section II. Differences in Contents	242
-------------------------------------	-----

1. Differences in scope	242
-------------------------	-----

2. Differences in the portrayal of <i>homo medicabilis</i>	244
--	-----

PART FOUR: APPENDICES AND BIBLIOGRAPHY	251
--	-----

Appendix A. 'Genealogies' of Books of Medical Instruction	253
---	-----

Appendix B. Critical Reviews of Books of Medical Instruction	258
--	-----

Appendix C. Biographical Data on Editors or Authors of Books of Medical Instruction	277
---	-----

Appendix D. Other Books in Print by Editors or Authors of Books of Medical Instruction	285
--	-----

Appendix E. Osler's <i>The Principles and Practice of Medicine</i> : Some Historical Perspectives	291
---	-----

Appendix F. Key Headings in Two Books Devoted to the Topic of Diabetes Mellitus	294
Appendix G. Communications from Textbook Editors	322
Bibliography	333
Index	339

## List of Tables\*

1.	Distribution of book reviews of selected books of medical instruction	30-31
2.	Numbers of sentences, words, and words per sentence in Disease Descriptions of diabetes mellitus	48
3.	Distribution in Disease Descriptions of sentence types: simple vs nonsimple	51
4. (a)	Distribution in Disease Descriptions of sentences of pragmatic instruction: imperious and nonimperious	53
(b)	Percentage of imperious vs nonimperious sentences	54
5. (a)	Distribution in Disease Descriptions of traditional sentence types: assertive and nonassertive	56
(b)	Percentage of assertive vs nonassertive sentences	57
6.	Distribution in Disease Descriptions of intersentential markers of coherence	60
7.	Distribution in Disease Descriptions of personal pronouns	60
8.	Distribution in Disease Descriptions of terms naming biochemicals	62
9.	Distribution in Disease Descriptions of terms belonging to the domain of food, food supplements, and dietetics	62
10.	Distribution in Disease Descriptions of terms belonging to the domain of exercise and physical activity	62
11.	Distribution in Disease Descriptions of the terms 'prevention', 'protection', 'health' (and their variants)	64
12.	Distribution in Disease Descriptions of the term 'body'	64
13. (a)	Distribution in Disease Descriptions of terms referring to human subjects: Type A and Type B	66
(b)	Percentage of Type A vs Type B terms	67

\*Tables 2 through 19, 29, 40 through 56, and 58, 59 and 60 are accompanied by a companion Graph bearing the same number as the Table, and appearing on the page immediately following it.

14.	Distribution in Disease Descriptions of terms referring to human subjects: Types B, B <sub>1</sub> , and B <sub>2</sub>	69
15.	Distribution in Disease Descriptions of quantifications expressed in Arabic numerals	71
16.	Distribution in Disease Descriptions of bracketed constructions	71
17.	Distribution in Disease Descriptions of enumerated sets of words, phrases, etc.	73
18.	Distribution in Disease Descriptions of citations of works by other authors	73
19.	Number of authors per Disease Description as compared to total number of contributors per book	75
20.	32 chapter headings of <i>Joslin's Diabetes Mellitus</i>	77-78
21.	Schema of Disease Description of diabetes mellitus: T-1	78-79
22.	Schema of Disease Description of diabetes mellitus: T-2	80-81
23.	Schema of Disease Description of diabetes mellitus: T-3	81-82
24.	Schema of Disease Description of diabetes mellitus: P-1	82-83
25.	Schema of Disease Description of diabetes mellitus: P-2	83
26.	Schema of Disease Description of diabetes mellitus: P-3	83
27.	Schema of Disease Description of diabetes mellitus: P-4	83-84
28.	Schema of Disease Description of diabetes mellitus: P-5	84
29.	Mapping procedure between Schemata and Joslin's headings	84-87
30.	17 headings of the "List of Three-digit Categories"	100
31.	T-1: Table of Contents: Selected Headings	101
32.	T-2: Table of Contents: Selected Headings	101-102
33.	T-3: Table of Contents: Selected Headings	102-103
34.	P-1: Table of Contents: Selected Headings	103
35.	P-2: Table of Contents: Selected Headings	104
36.	P-3: Table of Contents: Selected Headings	104-107
37.	P-4: Table of Contents: Selected Headings	107-108
38.	P-5: Table of Contents: Selected Headings	108-109
39.	Mapping procedure between Selected Headings and the "List of Three-digit Categories"	109, 111
40.	Numbers of main lexical items in Selected Headings: Individual and group totals	114
41.	Distribution in Selected Headings of monosyllabic words	114
42.	Distribution in Selected Headings of personal pronouns	114
43.	Distribution in Selected Headings of gerunds	116
44.	Distribution in Selected Headings of compound nouns	116
45.	Distribution in Selected Headings of prepositional phrases	116

46.	Distribution in Selected Headings of adverbial clauses containing an infinitive	116
47.	Distribution in Selected Headings of Type One terms which name aberrant states, or which name indicators of aberrant states: 'Standard' vs 'nonstandard' terms	119
48.	Distribution in Selected Headings of Type Two terms which name aberrant states, or which name indicators of aberrant states	121
49.	Distribution in Selected Headings of terms belonging to the domain of treatment or care of the human organism	121
50.	Distribution in Selected Headings of the terms 'Health', 'Prevention', and their variants	121
51.	Distribution in Selected Headings of the term 'Body'	121
52. (a)	Distribution in Selected Headings of the term 'System' (or variant)	124
(b)	Terms indicating kinds of systems: 'Standard' vs 'non-standard'	124
53.	Distribution in Selected Headings of nouns which name anatomical structures of the human organism: 'Covert' vs 'overt' structures	126
54.	Distribution in Selected Headings of terms which belong to the domains of psychiatry, neurology, and behavioral psychology	128
55.	Distribution in Selected Headings of terms which name certain sexual, social, and developmental states or roles of the human organism	128
56.	Distribution in Selected Headings of terms which name so-called 'natural' approaches to the maintenance of health	128
57.	Three taxonomic classes in Selected Headings	130-136
58.	Distribution of Paratextual components in textbooks vs popular books	187
59.	Distribution of Nondiscursive elements: Textbooks vs popular books	230
60.	Numbers of books published by authors or editors of selected books of medical instruction	288-289
