
Contents

1	Introduction	1
1.1	Literature Review	2
1.2	Outline of the Work	7
2	The Two-Sector OLG Model	11
2.1	Production	11
2.2	Consumption and Savings	14
2.3	Market Clearing	18
2.4	Intertemporal Growth Process	20
2.5	Some Remarks	22
2.A	Mathematical Appendix	23
3	Temporary Equilibrium	27
3.1	The Interior Case	27
3.2	The Boundary Case	40
3.3	The General Case	42
3.4	Multiple Temporary Equilibria	44
3.5	Summary	50
3.A	Mathematical Appendix	51
4	Endogenous Growth and Cycles	65
4.1	Growth Paths and Steady States	65
4.2	Endogenous Growth	72
4.3	A Special Case: CES Technologies	76
4.4	Cyclical and Complex Growth	83
4.5	Summary	90
4.A	Mathematical Appendix	91

5	The Role of Expectations	113
5.1	Expectations Formation	113
5.2	The Limits of Perfect Foresight	122
5.3	Adaptive Expectations	133
5.4	Summary	140
5.A	Mathematical Appendix	143
6	The Effects of a Baby Boom	161
6.1	Literature Survey	161
6.2	A Log-Linear World	164
6.3	A More General Setup	169
6.4	Summary	176
6.A	Mathematical Appendix	179
7	Conclusions	185
	Bibliography	191
