

# ***Contents***

<b>1. <i>Introducing the Universe</i></b>	<b>1</b>
1.1 Prologue	1
1.2 The Course of Astronomy	5
1.3 Stars and Constellations	10
1.4 The Celestial Sphere	17
<b>2. <i>The Birth of Modern Astronomy</i></b>	<b>24</b>
2.1 Ancient Astronomy and Ptolemy	24
2.2 The Copernican Revolution	31
2.3 Kepler's Cosmology	36
2.4 Newton and Gravitation	44
<b>3. <i>The Earth in Astronomy</i></b>	<b>54</b>
3.1 The Telling of Time	54
3.2 The Seasons	59
3.3 Tides and Precession	63
3.4 Eclipses	69
<b>4. <i>The Solar System</i></b>	<b>78</b>
4.1 Inventory of the Solar System	78
4.2 Our Moon	85
4.3 Mariner and Mars	92
4.4 Venus and Mercury	102
4.5 The Jovian Planets	108
4.6 Interplanetary Matter	113
<b>5. <i>The Physics of Light</i></b>	<b>123</b>
5.1 Electromagnetic Radiation	123
5.2 Atoms and Spectra	129
5.3 Radiation Laws	138
5.4 Information from Spectra	143

<b>6. The Astronomer's Tools</b>	151
6.1 Refracting Telescopes	151
6.2 Reflecting Telescopes	157
6.3 Spectroscopy and Photometry	164
6.4 Radio Telescopes	168
6.5 IR, UV, and X-Ray Astronomy	174
<b>7. The Nature of Stars</b>	186
7.1 Distances and Magnitudes	186
7.2 Stellar Spectra	190
7.3 The Hertzsprung–Russell Diagram	195
7.4 Our Sun—A Typical Star	204
7.5 Binary Stars	216
7.6 Some Unusual Stars	221
<b>8. Stellar Evolution</b>	230
8.1 The Birth of Stars	230
8.2 Maturity and Old Age	235
8.3 Star Clusters	239
8.4 How Stars Die	246
<b>9. White Dwarfs and Neutron Stars</b>	251
9.1 White Dwarfs As Dead Stars	251
9.2 The Discovery of Pulsars	257
9.3 Pulsars and Neutron Stars	265
9.4 Black Holes in Space?	273
<b>10. The Special Theory of Relativity</b>	280
10.1 The Crisis in Classical Physics	280
10.2 The Birth of Special Relativity	286
10.3 Traveling Near the Speed of Light	298
10.4 Do Tachyons Exist?	305
<b>11. The General Theory of Relativity</b>	314
11.1 Gravitation and Warped Space-Time	314
11.2 Classical Tests	319
11.3 The Schwarzschild Black Hole	325
11.4 The Kerr Solution	331
11.5 Discovering Black Holes	337

<b>12. The Realm of the Galaxies</b>	345
12.1 Our Galaxy	345
12.2 The Mystery of the Nebulae	353
12.3 Hubble and Galactic Distances	357
12.4 Hubble Classification	365
12.5 Clusters of Galaxies	368
12.6 The Redshift	373
<b>13. Quasars and Exotic Galaxies</b>	379
13.1 The Discovery of Quasars	379
13.2 The Redshifts of Quasars	384
13.3 Peculiar Galaxies	394
13.4 Intrinsic Redshifts and New Ideas	405
<b>14. Cosmology and the Universe</b>	418
14.1 The Expanding Universe	418
14.2 The Big-Bang, Steady-State, and “Other” Cosmologies	423
14.3 The Young Universe	431
14.4 General Relativity and Cosmology	437
14.5 The Fate of the Universe	444
<b>Glossary</b>	452
<b>Appendix</b>	471
A.1 The Planets (Physical Data)	471
A.2 The Planets (Orbital Data)	471
A.3 Satellites of Planets	472
A.4 The Brightest Stars	473
A.5 The Nearest Stars	474
A.6 The Brightest Galaxies	475
A.7 The Nearest Galaxies	476
A.8 Messier Catalogue	476
<b>Index</b>	479
<b>Monthly Star Charts</b>
