

CONTENTS

Preface	v
1. THE NATURE AND FUNCTION OF LANGUAGE	1
<i>Linguistics: Symbols Make Man</i> , John Lotz	1
<i>On Linguistic Terms</i> , F. W. Householder, Jr.	15
2. APPROACHES TO THE STUDY OF LANGUAGE	26
<i>A Set of Postulates for the Science of Language</i> , Leonard Bloomfield	26
I. Introductory	26
II. Form and Meaning	27
III. Morpheme, Word, Phrase	28
IV. Example of a Special Assumption	28
V. Phonemes	29
VI. Construction, Categories, Parts of Speech	29
VII. Alternation	31
VIII. Historical Linguistics	32
<i>The Independence of Grammar</i> , Noam Chomsky	34
<i>On the Goals of Linguistic Theory</i> , Noam Chomsky	37
<i>"The Mathematical Theory of Communication"</i> by Claude L. Shannon and Warren Weaver, Charles F. Hockett	44
The Theory	45
Linguistic Applications	51
A. Continuous and Discrete in Speech	51
B. Phonemicizing	55
C. The Entropy and Redundancy of Speech	58

D. Phonology and Tactics	60
E. Immediate Constituents	61
F. Writing	62
General Implications	63

A Functional Analysis of Verbal Behavior, B. F. Skinner 67

Traditional Formulations	69
A New Formulation	73

Studies of the Conditioning of Verbal Behavior, Leonard Krasner 75

Survey of the Studies	76
Setting	76
Response	76
Reinforcing Stimuli	78
Populations	79
Examiners	79
Controls	79
Length of Experimental Sessions	79
Relationship of Conditionability to Personality Variables	80
Results	81
Discussion	88
Summary	91

3. SPEECH PERCEPTION 97

Recent Work in English Phonetics, J. D. O'Connor 97

What Can the New Techniques of Acoustic Phonetics Contribute to Linguistics?, Eli Fischer-Jorgensen 112

Introduction	112
The Techniques	116
Results and Problems	118
1. Vowels (Vocoids)	119
2. Consonants (Contoids)	126
3. Prosodic Features	132
4. Articulatory—Acoustic—Auditory	133
5. Segmentation	136
6. The Phonetic Manifestation of Functional Units—Distinctive Features	137
7. Phonemes from Curves?	141

Some Results of Research on Speech Perception, Alvin M. Liberman 142

An Analysis of Perceptual Confusions among Some English Consonants, George A. Miller and Patricia E. Nicely 153

Experimental Procedures	154
-------------------------	-----

Results	155
A Generalization of the Articulation Score	155
Linguistic Features	165
1. Voicing	165
2. Nasality	165
3. Affrication	165
4. Duration	166
5. Place of Articulation	166
A Covariance Measure of Intelligibility	167
Discussion	170
4. THE SEQUENTIAL ORGANIZATION OF LINGUISTIC EVENTS	176
<i>An Elementary Linguistic Theory</i> , Noam Chomsky	176
<i>The Problem of Serial Order in Behavior</i> , K. S. Lashley	180
Associative Chain Theories	181
Objections to the Associative Chain Theory	183
The Determining Tendency	184
The Schema of Order	185
"Priming" of Expressive Units	185
Internal and Overt Speech	186
Generality of the Problem of Syntax	187
Duration and Intensity of Nervous Discharge	188
Central Control of Motor Patterns	188
Space Coordinate Systems	189
Rhythmic Action	191
Interaction of Temporal and Spatial Systems	192
The Fundamental Mechanism of Integration	194
Summary	197
<i>Verbal Context and the Recall of Meaningful Material</i> , George A. Miller and Jennifer A. Selfridge	198
Learning Materials	201
Experimental Procedure	202
Summary	204
Appendix: Lists Used in Recall Experiment	205
<i>Free Recall of Redundant Strings of Letters</i> , George A. Miller	207
Characterization of Redundant Strings	208
Method	209
Results	210
Discussion	210
Summary	213

<i>On the Combination of Associative Probabilities in Linguistic Contexts</i> , Davis Howes and Charles E. Osgood	214
Summary	226
5. THE SEMANTIC ASPECTS OF LINGUISTIC EVENTS	228
<i>The Problem of Reference</i> , B. F. Skinner	228
Reference in an Ideal Language	234
The "Referents" in Other Types of Verbal Operant	237
<i>Meaning</i> , L. Bloomfield	239
<i>The Problem of Meaning in Linguistics</i> , W. V. Quine	251
<i>Syntax and Semantics</i> , Noam Chomsky	261
<u><i>Meaning and Use</i>, Rulon Wells</u> 1/2/4	269
1. Russell and Wittgenstein	269
2. The Dyadic Conception of Meaning	271
3. Bloomfield and Autonomy	272
4. Mill, Bloomfield, and Circumstances	275
5. Russell	277
6. Wittgenstein	278
<i>The Logic of Semantic Differentiation</i> , C. E. Osgood, G. Suci, and P. Tannenbaum	283
Meanings of "Meaning"	284
Linguistic Meaning	284
Psychological Meaning	285
Meaning as a Representational Mediation Process	286
Meaning as a Relational Concept	289
The Problem of Measurement	290
Physiological Methods	290
Learning Methods	291
Perceptual Methods	292
Association Methods	293
Scaling Methods	294
The Semantic Differential	294
Language as an Index of Meaning	295
Logic of Semantic Differentiation	296
<u><i>Trends in Content Analysis Today: A. Summary</i>, I. Pool</u>	300
I. What the Volume Covers	300
Qualitative Analysis	302
Intensity	303

Frequency	305
Contingencies	305
II. The Selection of Units of Analysis	309
III. Representational and Instrumental Communications	311
IV. Standardized Categories for Content Analysis	315
V. Measuring Tension	318
VI. Measuring Valence	319
VII. Linguistics and Content Analysis	323
1. Linguistics as a Model	324
2. Establishing the Semantic Identity of Different Forms	324
3. Establishing Semantic Relationships	325
4. Linguistic Indicators of Behavior	327
6. LANGUAGE ACQUISITION, BILINGUALISM, AND LANGUAGE CHANGE	331
<i>Language Development in Children</i> , John B. Carroll	331
Literature of the Subject	331
The Nature of Language	332
The Language Learning Process	333
Methodology of Research	334
Aspects of Language Development: Learning the Sounds of the Language	335
Morphology	335
Syntax	336
Vocabulary	336
Stages of Development	337
The First Few Months	337
The "Babbling" Stage	337
The Beginnings of Language Comprehension	337
The Beginnings of Symbolic Communication	338
The Beginnings of Differentiated Speech Communication	338
Later Stages	338
Gross Indices of Language Development	339
Interrelationships among Aspects of Language Development	339
Individual Differences in Language Development	340
Conditions Affecting Language Development	340
Speech Development in Handicapped Children	341
The Functions of Language in the Life of the Child	341
Implications for Language Arts Teaching	342
<i>Phonemic Patterning</i> , R. Jakobson and M. Halle	346
4.1 Stratification: Nuclear Syllable	346
4.12 The Role of the Nasal Consonant	346
4.13 The Primary Triangle	347
4.14 The Split of the Primary Triangle into Two Triangles, Consonantal and Vocalic	347

4.15	Patterning of Oral Resonance Features	348
4.16	Sonority Features in Relation to the Optimal Consonant and Vowel	348
	<i>Patterning in Children's Language Learning</i> , Werner F. Leopold	350
	<i>The Child's Learning of English Morphology</i> , Jean Berko	359
	Materials and Procedure	361
	Results	364
	Sex Differences	364
	Age Differences	364
	Formation of the Plural	364
	Verb Inflections	367
	Formation of the Possessive	368
	Adjectival Inflection	369
	Derivation and Compounding	369
	Analysis of Compound Words	370
	Conclusion	371
	<i>Languages in Contact</i> , Uriel Weinreich	376
	The Problem of Approach	376
	1.1 Contact and Interference	376
	1.2 Difference between Languages	376
	1.3 Psychological and Socio-Cultural Setting of Language Contact	377
	1.4 Language Contact and Culture Contact	379
	<i>Mechanisms and Structural Causes of Interference</i> , Uriel Weinreich	381
	2.1 Theoretical Preliminaries	
	2.11 Interlingual Identification of Expression and Content Units	381
	2.12 Coexistence or Merging of Systems	382
	2.13 The Nature of the Sign in Language Contact	383
	2.14 Interference in Speech and in Language	384
	2.15 Methods of Studying Speech Interference	385
	2.5 Total Amount of Interference	386
	2.51 Quantification of Interference	386
	2.52 Structure as a Determinant of Interference	387
	2.53 Comparisons of Interference in the Several Domains	390
	2.54 Interference and Language Shift	391
	2.55 Crystallization of New Languages from Contact	392
	<i>The Bilingual Individual</i> , Einar Haugen	395
	4.1 Bilingual Memoirs	396
	4.2 Language Aptitude	397
	4.3 The Age of Learning	398
	4.4 The Motivations for Use	399
	4.5 Bilingual Proficiency	400

4.6 Coexistence of Systems	402
4.7 The Effect on Intelligence	403
4.8 Personality and Character Formation	406
4.9 Summary and Hypotheses	406

<i>The Influence of Language-Acquisition Contexts on Bilingualism,</i> W. E. Lambert, J. Havelka, and C. Crosby	407
--	-----

Method	409
Classification of Subjects	409
Behavioral Indices of the Influence of Acquisition Contexts	410
Results and Discussion	411
Summary	414

7. PATHOLOGIES OF LINGUISTIC BEHAVIOR 415

<i>Operant Stuttering: The Control of Stuttering Behavior through Response-Contingent Consequences,</i> Bruce Flanagan, Israel Goldiamond, and Nathan Azrin	415
--	-----

<i>Aphasia as a Linguistic Problem,</i> Roman Jakobson	419
--	-----

<i>The Nature of Language Deficit in Aphasia,</i> Hildred Schuell and James J. Jenkins	427
---	-----

Introduction	427
Problem	431
Method	432
Subjects	433
Tests	434
Plan of Analysis	435
Results and Discussion	436
Score Distributions of Individual Tests	436
Phi Coefficients of the Tests	436
Phi Coefficients for the Subjects	438
Guttman Analysis	439
Cross Validation	445
Interpretation	445
Summary	446

<i>Grammatical Complexity and Aphasic Speech,</i> H. Goodglass and J. Hunt	448
---	-----

Procedure	449
Selection of Subjects	451
Results	451
Expressive Final S	451
Receptive Final S	452

Intercorrelations among the Tests	452
Discussion	453
<i>A Pilot Study of Aphasia among Bilinguals</i> , W. E. Lambert and S. Fillenbaum	455
Summary	459
8. LINGUISTIC RELATIVITY AND THE RELATION OF LINGUISTIC PROCESSES TO PERCEPTION AND COGNITION	460
<i>Science and Linguistics</i> , Benjamin L. Whorf	460
<i>Concerning Inferences from Linguistic to Nonlinguistic Data</i> , Joseph H. Greenberg	468
Introduction	468
Inferences from Phonology	470
Inferences from Semantics	471
Terminology	471
Hypotheses of Discrimination	472
Hypotheses of Similarity	474
Linguistic Meaning	476
Inferences from Structure	477
Conclusion	478
<i>A Study in Language and Cognition</i> , Roger W. Brown and Eric H. Lenneberg	480
The Whorf Thesis	480
Cognitive Differences between Linguistic Communities	481
Language in Causal Relation to Cognition	483
The Experiment	484
Measurement of Codability	486
Codability and Recognition	488
Summary	491
<i>The Language of Experience</i> , Eric H. Lenneberg and J. M. Roberts	493
The Problem and Early Approaches to It	493
Types of Hypotheses and Research Strategies	494
Three Criteria for the Selection of Data	497
Universality	497
Variation	498
Simplicity	498
The Language of Experience and the Structure of Its Reference	499
<i>Linguistic Determinism and the Part of Speech</i> , Roger W. Brown	503

CONTENTS

xv

The Noun and Verb in Children's Speech	504
Method	506
Results and Discussion	507
Summary	508
<i>Thought and Speech</i> , L. S. Vigotsky	509
<i>Variables in the Effect of Language on the Reproduction of Visually Perceived Forms</i> , David T. Herman, Richard H. Lawless, and Richard W. Marshall	537
Method	538
Results	541
Comparisons with the CHW Findings	541
The Set Variable and N of Figures Reproduced	543
Percentages of Language-Influenced Reproductions	543
Influence of the Word List I Labels	544
Influence of Word List II Labels	545
Total Language-Influenced Reproductions	546
A Test of Figure-Label Free Associations	546
Summary	550
