Series Editor's Preface	ix
<i>Robert Plomin</i>	
Preface	xi
1. Introduction: The Importance of Differences in Language Development	1
How Does the Study of Individual Differences Relate to Theories of Language Development?	2
<i>Empiricism</i>	3
<i>Nativism</i>	3
<i>Challenges to Nativism</i>	4
<i>Focus on the Child's Interchange With the World</i>	6
<i>The Nature of the Child's Contribution: Modularity</i>	7
<i>How Do Individual Differences in Language Relate to the Question of Mental Modules?</i>	9
Plan of the Book	10
2. Characterizing the Nature of the Differences	13
Some "Classic" Cases	13
How Do We Characterize These Differences?	15
Lexical/Vocabulary Development	17
<i>Types of Words in Early Spoken Vocabulary</i>	18
<i>Parallels in Content Between Comprehension and Production</i>	19
<i>Differences in Rate of Acquisition of Overall Vocabulary</i>	21

<i>Summary and Implications</i>	21
Early Grammatical Development	22
<i>Use of Nominal Versus Pronominal Forms</i>	24
<i>Formulaic Expressions</i>	25
<i>Dummy Words and Reduplicated Forms</i>	26
<i>Pivot-Open Versus Telegraphic Grammar</i>	27
<i>Consistency in the Use of Word Ordering Rules</i>	29
<i>Inflections and Grammatical Morphology</i>	30
<i>Summary and Implications</i>	31
Phonological Development	33
<i>Sequence of Phonological Development</i>	34
<i>Prosody Versus Phonemic Analysis and Intelligibility</i>	34
<i>Phonological Learning Styles</i>	36
<i>Differentiating Versus Simplifying Approaches to Phonological System Development</i>	37
<i>Summary and Implications</i>	37
Pragmatic Development	39
<i>Informational Versus Interpersonal Functions</i>	39
<i>Orientation to Conversation/Context</i>	40
<i>Do Form and Function Coincide?</i>	40
<i>Are Expressive Children More Social?</i>	41
<i>Summary and Implications</i>	42
A Look Forward	42
For Further Reading	43
3. Are There Styles of Language Development?	45
Strengths and Weaknesses	48
Generalized Patterns: Correlated Tendencies	49
Persistence Over Time	51
<i>Continuity of Style Into Multiword Speech and Productive Control Over Grammar</i>	52
<i>A Comparison of Large Sample and Individual Research on Continuity</i>	54
<i>Convergence of Styles</i>	56
<i>Do Language Styles Extend Beyond the Early Stages of Acquisition?</i>	57
<i>Within-Child Consistency Across Situations</i>	58
<i>Children Acquiring a Second Language</i>	59
<i>Summary and Implications</i>	60
Relation to General Developmental Level	61
<i>Vocabulary</i>	61
<i>Syntax</i>	63
<i>Intelligence</i>	65
<i>Summary and Implications</i>	67
Are There Styles of Language Development?	68

4. Explanations for Individual Differences in	
Language Development	71
General Environmental Explanations	72
<i>Relations to Gender, Birth Order, and Socioeconomic</i>	
<i>Status</i>	72
<i>Other Characteristics</i>	74
<i>Critique of General Environmental Explanations</i>	74
Social Explanations	74
<i>Variation in Type of Input</i>	74
<i>Parental Responsiveness Versus Directiveness</i>	75
<i>Object/Social Orientation of Parent-Infant Dyad</i>	76
<i>Critique of Social Models</i>	78
Nelson's Cognitive-Social Interactional Model	79
<i>Does Context Influence What Parents Say to</i>	
<i>Children?</i>	81
<i>Do Form and Function Coincide?</i>	81
<i>Do Children Make Differential Use of Input?</i>	82
<i>Critique of Nelson's Model</i>	83
Cognitive Internal Explanations	84
<i>Orientation to Symbolization</i>	84
<i>Patterns and Dramatists</i>	84
<i>Analytic and Holistic Approaches in Symbolic Play</i>	86
<i>Analytic Versus Holistic Approaches in Other Aspects</i>	
<i>of Sensorimotor Development</i>	87
<i>Analytic Versus Holistic Processing</i>	88
<i>Critique of Cognitive Internal Models</i>	89
Internal Explanations	89
<i>Tendency to Imitate</i>	89
<i>Critique of Imitativeness</i>	90
<i>Object/Personal Orientation and Mastery Motivation</i>	91
<i>Temperament</i>	92
<i>Critique of Internal Motivation and Temperament</i>	
<i>Models</i>	94
Language-Specific Internal Explanations	95
<i>Biological/Genetic Underpinnings</i>	
<i>for Language Styles</i>	95
Explanations Involving the Language System	96
<i>Dissociations Between Aspects of Language</i>	96
<i>Differential Sensitivity to Language Input</i>	97
<i>Neurological Explanations</i>	98
<i>Critique of Language-Specific Internal Hypotheses</i>	99
Why Do Children Differ in Their Approach	
<i>to Language Acquisition?</i>	100

5. Conclusions and Future Directions	104
Where Are We?	104
<i>Summary of Language Style Differences</i>	105
<i>Are There Styles of Language Development?</i>	105
<i>Why Do Children Differ in Their Approach to Language Acquisition?</i>	106
Where Do We Go From Here?	106
<i>Research on the Nature of Individual Differences in Language</i>	106
<i>Generalizability Across Cultures and Languages</i>	107
<i>Sources of Individual Differences in Language</i>	108
<i>Research on Later Individual Differences</i>	109
<i>Implications for Intervention</i>	110
New Directions in Language Development Theories and Their Relationship to Individual Differences	111
Ecological Theory	112
Chaos Theory	113
<i>Nonlinear Influences on Systems</i>	113
<i>Equilibrium, Stability, and Ideal End States</i>	114
<i>Responding to Multiple Influences: Emergent Causes for Patterns of Change</i>	114
<i>Sensitive Dependence on Initial Conditions</i>	115
Parallel-Distributed Processing (PDP) or Connectionism	116
<i>What Are Connectionist Networks?</i>	116
<i>Language Development Without Symbols?</i>	117
<i>How Does Connectionism Account for Individual Differences?</i>	118
Common Themes in Ecological, Chaos, and Connectionist Theories and How They Apply to Individual Differences	119
What Can Individual Differences Tell Us About the Mechanisms of Language Development?	121
Theoretical Implications: Modularity Theories and Nativism	123
<i>Implications for Universality</i>	123
<i>Implications for Domain Specificity</i>	124
Toward an Alternative Theory	125
