Preface xi
Catherine E. Snow

Introduction xiii
David J. Messer and Geoffrey J. Turner

Notes on Contributors xxiii

SECTION I: THE DEPLOYMENT OF SPEECH DURING EARLY DEVELOPMENT

1 The relationship of maternal speech to children's first words
Margaret Harris 3

2 Is early speech situational? An examination of some current theories about the relation of early utterances to the context
Anat Ninio 23

3 Affording social-cognitive skills in young children: the overhearing context
Michael A. Forrester 40

SECTION II: LINGUISTIC INTERACTION AND FAMILY BACKGROUND

4 Initial production of inflections in bilingual children
Tove Klausen, Marlene S. Subritzky and Mariko Hayashi 65

5 Social class, maternal speech and the child's semantic orientation
Geoffrey J. Turner 93

SECTION III: SITUATIONAL INFLUENCES ON GRAMMAR

6 Critical influences on the acquisition of verb transitivity
Richard Ingham 121

7 Do young children use definite expressions for specific references?
Rosemary J. Stevenson and Kerry M. Sims 138

SECTION IV: MULTIDIMENSIONAL ASPECTS OF LANGUAGE

8 Children's comprehension and production of locative expressions
Morag L. Donaldson and Katrina Laing 159

9 Intonation and function of four-year-olds' tag constructions
Barbara Lloyd and Roger Goodwin 179

SECTION V: CONSTRAINTS ON LANGUAGE DEVELOPMENT

10 Phonological processes and sign language development
John Clibbens and Margaret Harris 197

11 Increasing metalinguistic awareness to assist phonological change
Janet Howell, Anne Hill, Elizabeth Dean and Daphne Waters 209

12 The nature of the linguistic and communication difficulties of children with autism
Rita Jordan 229

List of Tables

Table	1.1:	Examples of children's early words categorised according to context of use	10
Table	1.2:	The first ten words produced by the children, grouped according to initial use	11
Table	1.3:	Examples of changes in word use during the observation period	12
Table	1.4:	Initial and subsequent uses of first ten words produced by each child	13
Table	1.5:	Examples of relationship between a child's initial use of a word and the mother's use of that word	14
Table	1.6:	Relationship between children's initial and subsequent uses of words and maternal uses	15
Table	3.1:	Infants' responses to reference	54
Table	4.1:	Early noun and verb inflection	71
Table	4.2:	Parental speech for Gitte	75
Table	4.3:	Vocabulary breakdown for Gitte	76
Table	4.4:	Parental speech for Natasha	79
Table	4.5:	Vocabulary breakdown for Natasha	80
Table	4.6:	Parental speech for Adam	82
Table	4.7:	Vocabulary breakdown for Adam	83
Table	4.8:	Parental speech for Genki	86
Table	4.9:	Vocabulary breakdown for Genki	86
Table	5.1:	Number of children in the MC, WC (all) and WC (–LP) sub-samples assigned to the categories in the 'Long' index of the child's speech, using total sample means	107
Table	5.2:	Number of children in the MC, WC (all) and WC (–LP) sub-samples assigned to the categories in the 'Long' index of the child's speech, using MC and WC (all) sub-sample means	107
Table	5.3:	Maternal speech: length, mean number of answers with reality comments and situational delimiters; correlations with social class for total sample	108
Table	5.4:	Correlations between length, reality	

comments and situational delimiters in maternal speech and the 'Long' index of the child's speech for the total sample, MC sub-sample, WC (all) sub-sample and WC (–LP) sub-sample 109
Table 5.5: Correlations between length, reality comments and situational delimiters in maternal speech and the child's use of narrative in the instructional and descriptive contexts for WC (–LP) sub-sample 110
Table 5.6: Correlations between sex of child, ability scores, social class and the communication and control index and the 'Long' index of the child's speech for the WC (–LP) sub-sample 111
Table 6.1: Presentation conditions 129
Table 6.2: Verbs, actions and affected objects 130
Table 6.3: Initial breakdown of responses 133
Table 6.4: Transitive and intransitive responses 133
Table 7.1: Discriminative colour scores (similar condition) and character scores (identical condition) in same-gender conditions 150
Table 7.2: Discriminative and irrelevant colour and character scores 151
Table 8.1: Levels of comprehension and of production 162
Table 8.2: Mean number of correct responses on each task for each age group 171
Table 8.3: Number of subjects passing each combination of tasks 172
Table 9.1: Syntactic types of tags 186
Table 9.2: Pragmatic functions of full tags 186
Table 9.3: Pragmatic functions of simple tags 186
Table 9.4: Intonation contours of all tags 188
Table 9.5: Intonation contours of full tags 188
Table 9.6: Intonation contours of simple tags 188
Table 9.7: Intonation contours of other tags 189
Table 9.8: Syntactic contours of tags by gender 189
Table 9.9: Pragmatic functions of full and simple tags by gender 190

Table 10.1: Four-stage model of handshape development in ASL 200
Table 10.2: Signs produced over target period 202
Table 10.3: Initial handshape substitutions and later forms 204
Table 11.1: Number of simplifying processes used by each subject pre- and post-treatment 220
Table 11.2: Mean percentage scores for metalinguistic tasks pre- and post-treatment 224
Table 12.1: Definitions of categories of communicative function 237
Table 12.2: Development of communicative functions in the signing of children with autism 238
Table 12.3: Ontogeny of spontaneous communicative functions in the signing of children with autism 241
