

## **Contents**

### **Part I**

#### **Neurobiological advances**

- Evolutionary neurobiology and the origin of language as a cognitive adaptation . . . . .  
*Harry J. Jerison* 3

- Language development and biological programming: behavioral and electrophysiological indices . . . . .  
*Dennis L. Molfese and Victoria J. Molfese* 11

- Primate communication, comparative neurology, and the origin of language reexamined . . . . .  
*Horst D. Steklis* 37

### **Part II**

#### **Perceptual bases**

- Grasping and the gesture theory of language origins . . . . .  
*Joseph L. Fischer* 67

- Ways to accelerate progress in glottogonic research . . . . .  
*Gordon W. Hewes* 79

- Implication and the evolution of language . . . . .  
*Andrew Lock* 89

- Perceptual bases for the evolution of speech . . . . .  
*Richard M. Warren* 101

### **Part III**

#### **Fossil evidence**

- Neoteny and language evolution . . . . .  
*Bernard H. Bichakjian* 113

Language evolution and paedomorphosis . . . . .	137
<i>Jan Wind</i>	
Language evolution and paedomorphosis. A reply to Jan Wind . . . . .	145
<i>Bernard H. Bichakjian</i>	
Brain size and the evolution of language . . . . .	149
<i>Kathleen R. Gibson</i>	
Laryngeal descent in 40.000 year old fossils . . . . .	173
<i>Grover S. Krantz</i>	
Part IV	
Linguistic evidence	
Live speech and preverbal communication . . . . .	183
<i>Ivan Fónagy</i>	
On linguistic territoriality, iconicity and language evolution .	205
<i>Marge E. Landsberg</i>	
Vestiges of primeval phonology in certain ancient languages	219
<i>Saul Levin</i>	
The synchronous development and kinesis: Further evidence	227
<i>Walburga von Raffler-Engel</i>	
Behavioral flexibility and the evolution of language . . . . .	247
<i>Willem de Winter</i>	
Index . . . . .	271
