## Editorial

<b>J. Pohl</b> .....	1
----------------------	---

## Fractures, Pseudotachylite Veins and Breccia Dikes in the Crater Floor of the Rochechouart Impact Structure, SW-France, as Indicator of Crater Forming Processes

<b>L. Bischoff, W. Oskierski</b> .....	5
----------------------------------------	---

## Impact Structures in Brazil

<b>A. Penteado Crosta</b> .....	30
---------------------------------	----

## The Sudbury Structure, Ontario, Canada — A Review

<b>B. O. Dressler, G. G. Morrison, W. V. Peredery, B. V. Rao</b> .....	39
------------------------------------------------------------------------	----

## Continuous Deposits of the Ries Crater, Germany: Sedimentological and Micropaleontological Investigations of NASA Drill Core D

<b>R. Ostertag, W. Gasse</b> .....	69
------------------------------------	----

## The Rb-Sr-Age of the Rochechouart Impact Structure, France, and Geochemical Constraints on Impact Melt-Target Rock-Meteorite Compositions

<b>W. U. Reimold, W. Oskierski</b> .....	94
------------------------------------------	----

## The Use of Airborne and Spaceborne Radar Images for the Detection and Investigation of Impact Structures

<b>B. Theilen-Willige</b> .....	115
---------------------------------	-----

## The Hico Impact Structure of North-Central Texas

<b>L. Wiberg Milton</b> .....	131
-------------------------------	-----

<b>Book Review</b> .....	141
--------------------------	-----
