

CONTENTS

Preface	ix
<i>Noel Williams</i>	
Chapter I : Approaches to Computer Assisted Writing	1
<i>Noel Williams</i>	
Abstract	1
1 What makes good writing software?.....	1
2 <i>RUSKIN</i> : a brief description	6
3 Speculation.....	15
References.....	15
Chapter II : Designing Computational Writing Tools within a Linguistic Model of the Writing Process	17
<i>Stefanie Cookson</i>	
Abstract	17
1 Models of writing and computer aids	17
2 Speaking and writing	18
3 Conclusions.....	21
References.....	21
Chapter III : Developing a <i>Writer's Assistant</i>	22
<i>Mike Sharples, James Goodlet and Lyn Pemberton</i>	
Abstract	22
1 An introduction to the <i>Writer's Assistant</i>	22
2 Why build a <i>Writer's Assistant</i> ?	23
3 Development methodology	24
4 A model of the writing process	25
5 Task analysis of writers	28

6 Functional specification	29
7 Model of writing for the <i>Writer's Assistant</i> and task description language	29
8 The Issue Based Information System and design documents.....	30
9 System functionality and mockups	31
10 Cycle of implementation and evaluation	34
11 Conclusions.....	35
Acknowledgments.....	35
References.....	36

**Chapter IV : Language Understanding and the Cognitive
Ergonomics of Style.....** 38
Anthony Sanford and Linda Moxey

Abstract	38
1 Introduction.....	38
2 Style indicators : the desirable and the computable	38
3 Punctuation (especially commas)	40
4 Sounds-like effects (from howlers to the subtle)	41
5 Sentence length and modulation	43
6 The delivery of advice.....	44
7 The sound of writing : cognitively ergonomic?	46
8 Conclusions.....	48
Acknowledgment	48
References.....	48

Chapter V : Models of Writing: a Question of Interaction? 50
Patrik Holt

Abstract	50
1 Introduction.....	50

2 Cognitive psychology and models of writing	50
3 The Flower and Hayes model of writing	53
4 Other models of writing	56
5 Delivering advice	56
6 Delivery and interaction.....	58
7 Conclusion	59
References.....	59

**Chapter VI : Guidelines for Multiple Users Creating Hypertext :
SQL and Hypercard Experiments** 61

Roy Rada

Abstract	61
1 Introduction.....	61
2 Database	65
3 Hypercard.....	73
4 Discussion.....	81
Acknowledgments.....	85
References.....	85

**Chapter VII : The Influence of Discourse Structure on Display and
Navigation in Hypertexts.....** 90

Patricia Wright and Ann Lickorish

Abstract	90
1 Introduction.....	90
2 Categories of design decisions.....	93
3 Highly cohesive text structures.....	101
4 Modular text structures	105
5 Hierarchical and matrix text structures	107
6 Multi-theme text structures	114
7 Conclusions.....	117

Acknowledgments.....	120
References.....	120
Chapter VIII : Computational Story Writing	125
<i>Masoud Yazdani</i>	
Abstract.....	125
1 Introduction.....	125
2 Can a computer write a story?	126
3 Beyond TALE-SPIN	134
4 A new approach.....	137
5 Conclusions.....	144
References.....	145
Chapter IX : Computer Assisted Essay Writing : an Interdisciplinary Development Project at Eikeli Grammar School	148
<i>Unni Hovstad</i>	
Abstract.....	148
1 The integration of computers in Norwegian schools : a summary.....	148
2 Overview of the project in computer assisted essay writing	149
3 The modules used in the analysis of English essay writing	150
4 Pedagogical justification for each module.....	151
5 Conclusion	159
Epilogue : where do we go from here?	161
<i>Patrik Holt and Peter Hartley</i>	
Index	163
