

## Contents

Preface . . . . .	vii
Acknowledgments . . . . .	x
<b>Chapter 1. Viewing Language as a Knowledge-based Process . . . . .</b>	<b>1</b>
1.1 What every language user knows . . . . .	2
1.2 The evolution of linguistic science . . . . .	6
1.3 The computational paradigm . . . . .	13
1.4 Practical relevance . . . . .	22
Further Readings . . . . .	30
Exercises . . . . .	32
<b>Chapter 2. Word Patterns and Word Classes . . . . .</b>	<b>35</b>
2.1 Patterns and matching . . . . .	36
2.2 Word classes . . . . .	46
2.3 Transition networks . . . . .	54
2.4 Deterministic recognition with transition networks . . . . .	60
Further Readings . . . . .	67
Exercises . . . . .	67
<b>Chapter 3. Context-free Grammars and Parsing . . . . .</b>	<b>72</b>
3.1 Three approaches to structure . . . . .	73
3.2 Rules and derivations . . . . .	82
3.3 Parsing with context-free grammars . . . . .	87
3.4 A sampler of recognition procedures . . . . .	93
3.5 Refinements to the basic recognition procedures . . . . .	108
3.6 Charts and the active chart parser . . . . .	116
Further Readings . . . . .	127
Exercises . . . . .	128

<b>Chapter 4. Transformational Grammar</b> . . . . .	133
4.1 The inadequacies of phrase structure grammars . . . . .	134
4.2 Generalized rewrite rules . . . . .	139
4.3 The basic transformational model . . . . .	149
4.4 Refinements in the standard theory . . . . .	164
4.5 Criteria considered in developing syntactic theories . . . . .	173
4.6 Computational implications of transformational grammar . . . . .	186
Further Readings . . . . .	189
Exercises . . . . .	191
<b>Chapter 5. Augmented Transition Network Grammars</b> . . . . .	195
5.1 Recursive transition networks . . . . .	196
5.2 Augmenting the network . . . . .	204
5.3 The use of registers in ATN grammars . . . . .	210
5.4 The ordering of actions and conditions . . . . .	220
5.5 Non-local context and hold registers . . . . .	223
5.6 Further syntactic issues . . . . .	244
5.7 Implementation of ATN parsers . . . . .	261
Further Readings . . . . .	266
Exercises . . . . .	267
<b>Chapter 6. Feature and Function Grammars</b> . . . . .	272
6.1 The goals of systemic grammar . . . . .	273
6.2 Functions and systems . . . . .	280
6.3 Choice systems . . . . .	289
6.4 Realization . . . . .	299
6.5 Case grammar . . . . .	311
6.6 Functional grammars . . . . .	326
6.7 Generalized phrase structure grammars . . . . .	344
Further Readings . . . . .	351
Exercises . . . . .	353
<b>Chapter 7. Computer Systems for Natural Language Parsing</b> . . . . .	357
7.1 Issues in the design of a parsing system . . . . .	361
7.2 Augmented phrase structure grammar systems . . . . .	377
7.3 Systems based on transformational grammars . . . . .	383
7.4 Chart rewrite systems . . . . .	387
7.5 ATN-based systems . . . . .	390
7.6 Pattern matching systems . . . . .	398
7.7 Situation-action parsers . . . . .	401
Further Readings . . . . .	410
Exercises . . . . .	411

<b>Appendix A. A Language for Describing Objects and Procedures</b>	415
A.1 Programming and description	417
A.2 Classes and objects	419
A.3 Descriptions of procedures	428
A.4 A specification of the language constructs	442
A.5 Standard definitions	454
<b>Appendix B. An Outline of English Syntax</b>	465
B.1 The clause	469
B.2 The noun group	511
B.3 Other groups and specialized structures	521
B.4 Word classes	531
Index of syntactic terms	551
<b>Appendix C. Current Directions in Transformational Grammar</b>	555
C.1 Reorganization of the model	558
C.2 Constraints on rule operation	567
C.3 New kinds of structures	572
C.4 New kinds of rules	578
<b>Appendix D. An ATN Grammar for English</b>	583
D.1 Formal definitions for ATN structures and processes	585
D.2 An ATN grammar	595
Bibliography	601
Author index	617
Topic index	621
