PREFACE	vii
KEY-NOTE ADDRESS	ix
<i>Gunnar Fant</i>	
Part One. SYSTEMS	
A Tutorial on Speech Understanding Systems	3
<i>Allen Newell</i>	
Applications of Limited Vocabulary Recognition Systems	55
<i>Thomas B. Martin</i>	
Speech Recognition: Old and New Ideas	73
<i>Peter Denes</i>	
Philosophies of Speech Recognition	83
<i>E. P. Neuberg</i>	
Part Two. PARAMETER AND FEATURE EXTRACTION	
Parametric Representations of Speech	99
<i>Ronald W. Schafer</i>	
<i>Lawrence R. Rabiner</i>	
Rounding Errors in Fixed Point Arithmetic	151
<i>W. Morven Gentleman</i>	
General Speech Models and Linear Estimation Theory	157
<i>Martin Morf</i>	
<i>Thomas Kailath</i>	
<i>B. Dickinson</i>	
Linear Prediction in Automatic Speech Recognition	183
<i>John Makhoul</i>	

Linear Prediction of Speech—Recent Advances with Applications to Speech Analysis <i>Bishnu S. Atal</i>	221
An Optimal Linear Prediction Synthesizer Structure for Array Processor Implementation <i>John D. Markel</i> <i>Augustine H. Gray, Jr.</i>	231
Part Three. ACOUSTICS	
Concepts for Acoustic Phonetic Recognition <i>David J. Broad</i> <i>June E. Shoup</i>	243
The Phonological Component of an Automatic Speech- Recognition System <i>Paul S. Cohen</i> <i>Robert L. Mercer</i>	275
Word Verification in a Speech Understanding System <i>Dennis H. Klatt</i>	321
Part Four. SYNTAX AND SEMANTICS	
Syntax, Semantics, and Speech <i>William A. Woods</i>	345
Performance Grammars <i>Jane J. Robinson</i>	401
Understanding Tasks Stated in Natural Language <i>John R. Hayes</i> <i>Herbert A. Simon</i>	428
Part Five. SYSTEMS ORGANIZATION AND ANALYSIS SYSTEMS	
Tutorial on System Organization for Speech Understanding <i>D. Raj Reddy</i> <i>Lee D. Erman</i>	457
Parallel Processing in Speech Understanding Systems: A Survey of Design Problems <i>Victor R. Lesser</i>	481
Module Linkage and Communication in Large Systems <i>Jeffrey A. Barnett</i>	500
Stochastic Modeling for Automatic Speech Understanding <i>James K. Baker</i>	521
