| Preface | | viii | |
|---------|--|------|--|
| Part I | | | |
| 1 | Introduction | 1 | |
| | 1.1 Language interpretation problems | 1 | |
| | 1.2 Memory, context, and focus | 4 | |
| | 1.3 The experimental text processing system | 6 | |
| 2 | The mechanisms | 8 | |
| | 2.1 Representation in memory | 8 | |
| | 2.2 Representation of context | 15 | |
| | 2.3 Marker processing | 24 | |
| 3 | Solving interpretation problems | 32 | |
| | 3.1 Using the mechanisms during interpretation | 32 | |
| | 3.2 Noun phrase reference interpretation | 33 | |
| | 3.3 Relationship interpretation | 38 | |
| | 3.4 Word sense disambiguation | 43 | |
| | 3.5 Other interpretation operations and some limitations | 46 | |
| 4 | Related research and a summary | 48 | |
| | 4.1 The memory formalism | 48 | |
| | 4.2 The context mechanism | 56 | |
| | 4.3 The marker processing model | 68 | |
| | 4.4 Summary of the mechanisms | 72 | |

Contents

Part II _

| 5 | Introduction to the Capture system | 76 |
|---|---|-----|
| | 5.1 Language processing tasks | 76 |
| | 5.2 The database capture task | 80 |
| | 5.3 What the Capture system does | 82 |
| | 5.4 Overview of how Capture works | 85 |
| 6 | Applying the mechanisms in Capture | 88 |
| | 6.1 Memory representation in Capture | 88 |
| | 6.2 Context factors and their management in Capture | 93 |
| | 6.3 Interpretation operations in Capture | 98 |
| | 6.4 The analyser and its output | 99 |
| | 6.5 Noun phrase reference interpretation | 102 |
| | 6.6 Relationship interpretation | 102 |
| | 6.7 Alternative analysis disambiguation | 110 |
| | | 110 |
| 7 | Performing database capture | 115 |
| | 7.1 The target databases | 115 |
| | 7.2 Database management system assumptions | 115 |
| | 7.3 Task-specific operations | |
| | 7.4 Sentence processing in Capture | 120 |
| | 7.5 Interleaving interpretation and task operations | 126 |
| | 7.6 Handling other constructions | 134 |
| | 7.7 Evaluation of the mechanisms with Capture | 138 |
| | 7.8 Applicability to similar tasks | 141 |
| | | 144 |
| 8 | Techniques for efficient retrieval | 146 |
| | 8.1 The indexing scheme and basic searches | 147 |
| | 8.2 Clustering for the indexing scheme | - • |
| | 8.3 Propagations in very large networks | 150 |
| | 8.4 Efficiency analysis of the intersection search | 153 |
| | South | 157 |

Appendices

| A. Example texts and output | 159 |
|--|-----|
| B. Examples of the influence of context factor types | 173 |
| References | 178 |
| Index | 186 |
